## MARKET COMMENTARY

- **Commentary:** Global stocks marginally higher for the month, led by Asian equities. MSCI AC World lost -2% in MYR terms. Russia was a standout underperformer, declining -8.3% on political uncertainty and riots following elections. EM and India underperformed; MSCI Emerging Market Index lost -4.6%, while Indian equities declined -2.1%
- **Equity Market Strategy:** Equities remain an attractive investment proposition on the back of rising yields environment and improving global economic outlook. We continue to favour Asia ex-Japan and Emerging Markets region although we recognise selected EM markets are facing some domestic economic issues. These two regions continuing to offer some of the most attractive upside potential as their valuation still sport a substantial discount to its estimated fair value.
- **Bond Market Strategy:** We continue to underweight fixed income asset class to guard against the potential rise of interest rate. Within the fixed income portion, we prefer EM debts and Asian bonds which are expected to fare better in a growth-centric environment given their lower sensitivity on interest rate risk and positive correlation on economic activity. Locally, we believe the negative impact of the rising yields might be milder on local bonds especially corporate debts, because of the higher credit spread over Malaysia government bonds, stable interest rate environment and no signs of rising credit risk observed so far
