## CONSERVATIVE PORTFOLIO

The portfolio aims to achieve a slow but steady return by investing 90% into bond funds and 10% into equity funds. The target allocation may change with our views on financial markets. Currently we have an **overweight position in equities** and we are targeting to have an exposure of 80% bond funds and 20% equity funds.

- Commentary: Global stocks marginally higher for the month, led by Asian equities. MSCI AC World lost -2% in MYR terms. Russia was a standout underperformer, declining -8.3% on political uncertainty and riots following elections. EM and India underperformed; MSCI Emerging Market Index lost -4.6%, while Indian equities declined -2.1%
- Equity Market Strategy: Equities remain an attractive investment proposition on the back
  of rising yields environment and improving global economic outlook. We continue to favour
  Asia ex-Japan and Emerging Markets region although we recognise selected EM markets
  are facing some domestic economic issues. These two regions continuing to offer some of
  the most attractive upside potential as their valuation still sport a substantial discount to its
  estimated fair value.
- Bond Market Strategy: We continue to underweight fixed income asset class to guard
  against the potential rise of interest rate. Within the fixed income portion, we prefer EM
  debts and Asian bonds which are expected to fare better in a growth-centric environment
  given their lower sensitivity on interest rate risk and positive correlation on economic
  activity. Locally, we believe the negative impact of the rising yields might be milder on
  local bonds especially corporate debts, because of the higher credit spread over Malaysia
  government bonds, stable interest rate environment and no signs of rising credit risk
