FUND MANAGER'S REPORT

The Fund decreased 4.81% in November 2017, underperforming the FTSE Bursa Malaysia Small Cap Index (FBMSC) by 1.10%. Success Transformer and Frontken were the key underperformers for the month. Year-to-date, the Fund has increased 22.53%, while the benchmark has risen 14.08%.

In November, the FBMSC fell 3.71% to 16,787.88 pts. The 3Q17 result season failed to re-rate the market. In addition to this, the Sime demerger exercise failed to lift sentiments in the market. We saw net foreign outflows of RM15m, the fourth consecutive month of outflows. Year-to-date, net foreign inflows are RM9.37bn, compared with RM3.2bn outflows in 2016. Malaysia's economy expanded 6.2% yoy in 3Q17, the fifth straight quarter of improvement, as domestic demand strengthened. Bank Negara Malaysia kept the Overnight Policy Rate at 3% during the Monetary Policy Committee (MPC) meeting, but indicated that the MPC may consider reviewing the current degree of monetary accommodation given the strength of global and domestic macroeconomic conditions.

Market continued to drift lower in November. Thus far, global economic data have supported our view of better economic growth in 2018. For our 2018 strategy, we remain positive on the market and will continue to buy on dips on the back of 7% earnings growth forecast. Our base case is that there is no political upheaval arising from the 14th General Election expected in the first quarter of 2018. We continue to overweight Construction and Technology, and underweight Properties and Plantations.
