Principal China-India-Indonesia Opportunities Fund

29 February 2024

3-year Fund Volatility 7.65 Low
Lipper Analytics 15 Feb 2024

Fund Objective

The Fund aims to achieve medium to long-term capital appreciation by capitalizing on investments ideas in undervalued listed companies which are domiciled or have significant operations in China, India and Indonesia. The 'significant operations' means the major business of the company. Between 70% to 98% (both inclusive) of NAV will be invested in equities and equity related securities with at least 2% of NAV invested in liquid assets for liquidity purposes. The Fund may also invest up to 28% of its NAV in other permissible investments.

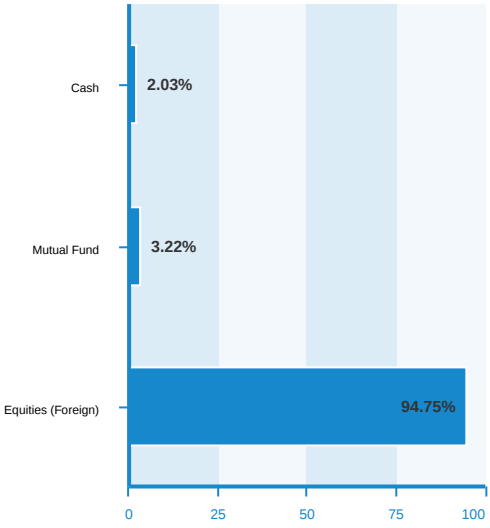
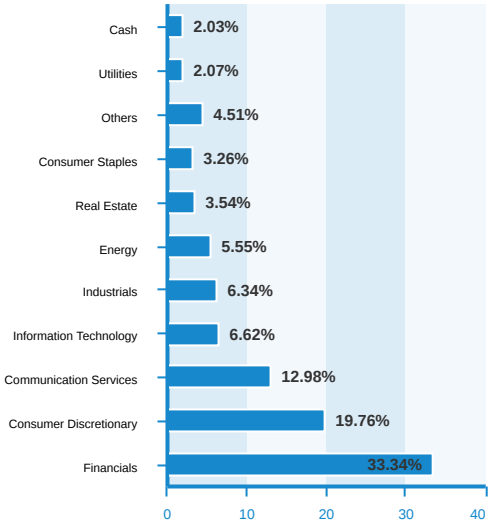
(3 years monthly data)

The holdings listed do not constitute a recommendation to purchase or sell a particular security. Any repeated issuer shown means same issuer with different coupon rate and/or maturity date. Cash and/or derivative positions that are not part of the core investment strategy will not be reflected in the top holdings list.

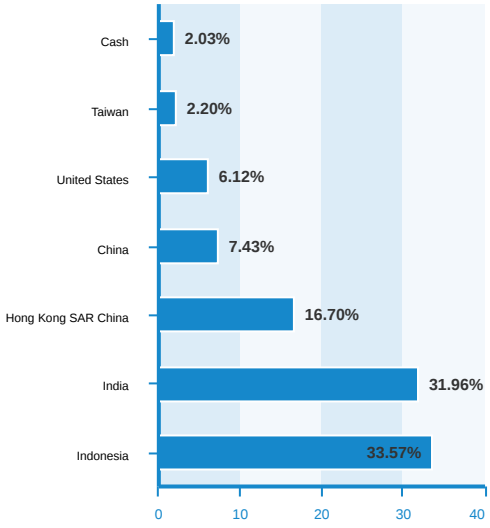
Asset Allocation (%)



Sector Allocation (%)



Regional Allocation (%)



Fund holdings and allocations shown are unaudited and may not be representative of current or future investments. Percentages may not add up to 100% due to rounding and/or inclusion or exclusion of cash will not be reflected in the top holdings list.

Fund Manager's Report

The Fund was up 4.75% in MYR terms in February, underperforming the benchmark by 33 bps. YTD, the Fund is up 6.00%, outperforming the benchmark by 154 bps.

In the month of January, MSCI China was up 8.4% in US Dollar terms while India was up 2.7% and Indonesia up 3.1%. Many levers of the Indian economy continue to be working well including but not limited to healthy urban consumption, rural economy improving from a low base albeit slowly, gross margin improvement from stabilizing to lower commodity price, industrial and property upcycle and healthy valuations. We expect political continuity in the upcoming general elections in Apr-May 2024 and valuations are fair. For Indonesia, we believe the market is undervalued even as there have been post-election inflows into the equity market. Companies are delivering on earnings as well as only less than 30% of companies reported below consensus estimated earnings so far. We continue to be positive on Indonesian banks which constitute the majority of our Indonesia stock allocation. The China equity market is currently hampered by the very weak property market which will have ramifications on consumption, local gov finances, construction industry and materials etc. There are some bright spots in exports (2M24 +7% y-y in USD-terms), electricity output (2M24 +11.7% y-y), as well as CNY consumption which indicates the strong desire to consume even though it is held back partly by economic weakness currently. Tourism revenue over Chinese New Year reached 632.7bil (+47.3% yoy or 107.7% of 2019 level). On country allocation, the Fund is overweight India, neutral Indonesia and underweight China.

---

^Based on the fund's portfolio returns as at 15 February 2024, the Volatility Factor (VF) for this fund is 7.65 and is classified as "Low" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. We recommend that you read and understand the contents of the Master Prospectus dated 25 June 2021, which has been duly registered with the Securities Commission Malaysia, before investing and that you keep the said Master Prospectus for your records. Any issue of units to which the Master Prospectus relates will only be made upon receipt of the completed application form referred to in and accompanying the Master Prospectus, subject to the terms and conditions therein. Investments in the Fund are exposed to country risk, currency risk, liquidity risk, risk of investing in emerging markets, risks associated with investment in warrants, stock specific risk. You can obtain a copy of the Master Prospectus from the head office of Principal Asset Management Berhad or from any of our approved distributors. Product Highlight Sheet ("PHS") is available and that investors have the right to request for a PHS; and the PHS and any other product disclosure document should be read and understood before making any investment decision. There are fees and charges involved in investing in the funds. We suggest that you consider these fees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. You are also advised to read and understand the contents of the Financing for Investment in Unit Trust Risk Disclosure Statement/Unit Trust Loan Financing Risk Disclosure Statement before deciding to borrow to purchase units. Where a unit split/distribution is declared, you are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in Malaysian Ringgit will remain unchanged after the distribution of the additional units.

Carefully consider a fund's objective, risks, charges and expenses.
