Factsheet

Manulife Investment U.S. Equity Fund

Market review

The U.S. stock market posted one of its strongest monthly gains in recent years this May. Signs of progress in trade negotiations and easing tensions between the U.S. and China aided returns. Relatively strong consumer spending trends, better-than-expected first-quarter corporate earnings, encouraging inflation data, and improving consumer confidence also helped. These tailwinds outweighed continued uncertainty around tariffs and the U.S. economic outlook. Within the Standard & Poor's 500 Index, the growth-oriented information technology, consumer discretionary, and communication services sectors notably outperformed. Conversely, the more defensive health care sector declined, while the real estate and energy sectors posted relatively flat returns.

Market outlook

We're encouraged by recent developments regarding trade negotiations, although how the tariff situation will play out is still unclear. We believe the portfolio is well positioned for a variety of scenarios, given its balance between offense and defence. The Fund ends the Period with roughly 32% of its assets in the information technology sector, which is in line with the S&P 500 index, a notable overweight in the consumer discretionary sector and a sizable underweight in the industrials sector.

Feeder fund review

In May, the Feeder Fund posted a) 7.18% versus the benchmark return of 6.15% for its USD class; b) 5.68% versus the benchmark return of 4.71% for its RM class; and c) 6.97% versus the benchmark return of 6.15% for its RM-Hedged class. The Fund outperformed its benchmark, and it was mostly attributable to security selection in the financials sector. The Feeder Fund will continue to be fully invested into the Target Fund. We rebalance the Feeder Fund when the invested level is affected by market volatilities, inflows and outflows of the Feeder Fund. We aim to maintain a target allocation of around 95%-98%.

Based on the Fund's portfolio returns as at 30 Apr 2025 the Volatility Factor (VF) for the Fund is as indicated in the table above and are classified as in the table (source: Lipper). "Very High" includes Funds with VF that are above 16.345, "High" includes Funds with VF that are above 11.980 but not more than 16.345, "Moderate" includes Funds with VF that are above 9.185 but not more than 11.980, "Low" includes Funds with VF that are above 4.730 but not more than 9.185 and "Very Low" includes Funds with VF that are above 0.000 but not more than 4.730 (source:FiMM). The VF means there is a possibility for the Funds in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF and VC are subject to monthly revision or at any interval which may be prescribed by FiMM from time to time. The Fund's portfolio may have changed since this date and there is no guarantee that the Funds will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.

The above information has not been reviewed by the SC and is subject to the relevant warning, disclaimer, qualification or terms and conditions stated herein. Investors are advised to read and understand the contents of the Master Prospectus dated 15 May 2023 and its First Supplemental Master Prospectus dated 20 October 2023 and its Second Supplemental Master Prospectus dated 12 February 2025 and all the respective Product Highlights Sheet(s) (collectively, the "Offering Documents"), obtainable at our offices or website, before investing. The Offering Documents have been registered with the Securities Commission Malaysia (SC), however the registration with the SC does not amount to nor indicate that the SC has recommended or endorsed the product. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from the pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in the Fund's denominated currency will remain unchanged after the distribution of the additional units. Past performances are not an indication of future performances. There are risks involved with investing in unit trust funds; wholesale funds and/or Private Retirement Schemes. Some of these risks associated with investments in unit trust funds; wholesale funds and/or Private Retirement Schemes are interest rate fluctuation risk, foreign exchange or currency risk, country risk, political risk, credit risk, non-compliance risk, counterparty risk, target fund manager risk, liquidity risk and interest rate risk. For further details on the risk profile of all the funds, please refer to the Risk Factors section in the Offering Documents. The price of units and income distribution may go down as well as up. Investors should compare and consider the fees, charges and costs involved. Investors are advised to conduct own risk assessment and consult the professional advisers if in doubt on the action to be taken.
