FUND OVERVIEW

This Fund aims to achieve maximum total returns through a combination of long-term[^] growth of capital and current income^{^^}.

Note:[^]"long-term" in this context refers to a period of between 5 to 7 years.

^{^^}The income is in the form of units. Please refer to the Fund's distribution mode.

The Fund's asset allocation is as follows:

- 30% to 70% of Net Asset Value (NAV): Investments in securities of companies with market capitalisation of not more than RM750 million ("small cap securities");
- 30% to 70% of NAV: Investments in fixed income securities, money market instruments, cash and deposits with financial institutions.

The Fund is suitable for investors who:

- Seek long-term capital appreciation through investments in high growth potential small cap securities whilst requiring the flexibility of a conservative portfolio of fixed income securities in order to capitalise and adapt to prevailing market conditions; and
- are willing to accept slightly higher risk in their investments than that normally associated with a general balanced fund in order to achieve long-term capital growth and income.
