	income to do so or (ii) increase the amount of distributable income to the Members, after taking into consideration the risk of distributing out of capital.		
	The Fund aims to provide Long Term capital growth. While this may generally mean that the Fund seeks to increase its NAV per unit over the Long Term, distributing out of capital may not necessarily erode the value of the investment of the Members as the distributions declared are reinvested back into the Fund. Hence, the Fund’s capital distribution, if any, would still be consistent with the investment objective of the Fund.	The Fund aims to provide Medium to Long Term capital growth. While this may generally mean that the Fund seeks to increase its NAV per unit over the Medium to Long Term, distributing out of capital may not necessarily erode the value of the investment of the Members as the distributions declared are reinvested back into the Fund. Hence, the Fund’s capital distribution, if any, would still be consistent with the investment objective of the Fund.	The Fund aims to preserve capital. While this may generally mean that the Fund seeks to increase its NAV per unit, distributing out of capital may not necessarily erode the value of the investment of the Members as the distributions declared are reinvested back into the Fund. Hence, the Fund’s capital distribution, if any, would still be consistent with the investment objective of the Fund.
	Distribution out of the Fund’s capital has the effect of lowering the NAV of the Fund, may reduce part of the Members’ original investment and may also result in reduced future returns to Members. When a substantial amount of the original investment is being returned to the Members, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished. <i>Note: Income distribution (if any) will be in the form of units. Please refer to the mode of distribution on page 63.</i>

Investing in CIS may be more costly to the Fund than if the Fund had invested in the underlying investments directly as the Fund will indirectly be paying the fees and expenses of the CIS. The Fund's investments in ETFs may subject the Fund to additional risks (such as risks related to the changes in the constituent securities of the index that the ETF is tracking which may result in the rise or fall of the price of the ETF or cessation of the index that the ETF is tracking which may result in the termination of the ETF) than if the Fund would have invested directly in the constituent securities of the index. Any adverse price movements of such ETFs will adversely affect the Fund's NAV.

Capital Distribution Risk

The Fund may distribute from its capital.

Capital distributions represent a return or withdrawal of part of the amount of the Members' original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.

Risk associated with investments in Equity-Related Securities

The Fund may also invest in equity-related securities such as warrants that are capable of being converted into shares. As warrants are linked to the particular equity securities from which they are derived, the warrants inherit the risks linked to that underlying equity security such as market risk, currency risk, industry risk and liquidity risk. For investments in warrants, a movement in the prices of the underlying securities of the warrants will generally result in a larger movement in the prices of the warrants, that is, higher volatility. In the event of a decline in the market, warrants can lose a substantial amount of their values, far more than the underlying securities and vice versa. Warrants also have a limited life and if they are not exercised at the maturity, they will expire and become worthless causing the value of the Fund's investments to fall. Like any other investments, the fall in the value of the Fund's investments will ultimately lower the NAV of the Fund."

1. The information related to the AmPRS – Moderate Fund, AmPRS – Conservative Fund, AmPRS – Islamic Equity Fund and AmPRS – Islamic Balanced Fund under item c. **“Investment Strategy”** of Section 5.2 **“FUNDS’ INFORMATION”** are hereby updated as below:

“AmPRS – Moderate Fund

The AmPRS – Moderate Fund may invest its assets into a well-diversified portfolio comprising the following asset classes:

- Equities and/or equity-related securities;
- Fixed income securities;
- Money market instruments; and
- Deposits.

To achieve its investment objective, the AmPRS – Moderate Fund will invest:

- 40% to 60% of the Fund’s NAV in equities and/or equity-related securities; and
- 40% to 60% of the Fund’s NAV in fixed income securities, money market instruments and/or deposits, where a minimum of 1% of the Fund’s NAV will be in deposits.

THIS THIRD SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 2 SEPTEMBER 2024 HAS TO BE READ IN CONJUNCTION WITH THE THIRD REPLACEMENT DISCLOSURE DOCUMENT FOR AmPRS DATED 2 APRIL 2021, THE FIRST SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 28 JULY 2021 AND THE SECOND SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 31 AUGUST 2023

The AmPRS – Moderate Fund will invest in securities that are traded and/or listed in the local and foreign Eligible Markets.

For the equity portfolio, the Investment Manager will first analyse the general economic and market conditions. The Investment Manager employs an active asset allocation strategy depending upon the equity market expectations. In an adverse market condition, the Investment Manager may increase the Fund's asset allocation to lower risk assets such as fixed income securities, money market instruments and/or deposits at the expense of the equities and/or equity-related securities allocation (within the stipulated asset allocation), to safeguard the investment of the Fund.

The equity portfolio aims to mitigate fluctuations that are brought by investment sectors and market capitalization differences. The portfolio may thus be diversified across investment sectors and market capitalization.

For fixed income portfolio, the Investment Manager will select securities that will deliver better returns for a given level of risk. In addition, the Investment Manager may also consider securities with a more favorable or improving credit or industry outlook that provide potential capital appreciation. The Fund may invest in securities with varying maturities.

The Investment Manager may opt to invest in the securities directly or via CIS of AFM or other CIS such as REITs and ETFs. The Investment Manager will be targeting CIS that have a similar investment objective to the Fund. In evaluating the suitability of the CIS, the Investment Manager, amongst other factors, will review the track record, investment objective, investment portfolio, income distribution policy and cost factors of the CIS.

In the event of a severe market condition, the Investment Manager may employ a temporary defensive position and deviate from the investment strategy and asset allocation of the Fund by reducing the Fund's exposure in equities and/or equity-related securities and increasing the Fund's exposure in fixed income securities, money market instruments and/or deposits.

The AmPRS – Moderate Fund may also invest in derivatives for the purpose of hedging (subject to the PRS Guidelines) if it is deemed necessary to do so.

AmPRS – Conservative Fund

The AmPRS – Conservative Fund may invest its assets into a well-diversified portfolio comprising the following asset classes:

- Fixed income securities;
- Money market instruments;
- Deposits;
- Equities and/or equity-related securities; and
- REITs.

To achieve the investment objective of the AmPRS – Conservative Fund, the Fund will primarily invest in fixed income securities, deposits and/or money market instruments to provide capital preservation* to the Fund. The Fund may also invest a maximum of 20% of its NAV in equities and /or equity-related securities to provide additional return to the Fund.

Investment in the AmPRS – Conservative Fund will be restricted to investments in Malaysia and local currency investments.

For fixed income portfolio, the Investment Manager will select securities/money market instruments that will deliver better returns for a given level of risk. In addition, the Investment Manager may also consider securities/money market instruments with a more favorable or improving credit or industry outlook that provide potential capital appreciation. The Fund may invest in securities/money market instruments with varying maturities. For AmPRS – Conservative Fund, the Investment Manager will invest in securities/money market

instruments with a minimum “P2” short-term local credit rating and/or “BBB3” long-term local credit rating by RAM or MARC equivalent at the time of investment. However, the AmPRS – Conservative Fund may hold a maximum of 5% of its NAV in fixed income securities/money market instruments which are rated below the minimum credit rating requirement as stipulated or unrated at the time of investment. In the event that the 5% limit is exceeded, whether as a result of:

- (a) a downgrade of any fixed income securities/Money Market Instruments to below the minimum credit rating requirement as stipulated;
- (b) an increase in the aggregate value of fixed income securities/money market instruments which are rated below the minimum credit rating requirement as stipulated and/or unrated; or
- (c) a decrease in the NAV of AmPRS – Conservative Fund.

the Investment Manager shall take immediate action to reduce such investments to comply with the 5% limit unless it is in the opinion of the Trustee that the disposal of such investments are not in the best interests of Members.

The equity portfolio aims to mitigate fluctuations that are brought by investment sectors and market capitalization differences. The portfolio may thus be diversified across investment sectors and market capitalization.

For REITs selection, the Investment Manager will be targeting REITs that have been generating regular income returns and have potential for capital growth.

The use of derivative is not applicable for the AmPRS – Conservative Fund as the Fund has no foreign currency exposure.

*Note: * Please note that Members’ capital is neither guaranteed nor protected.*

AmPRS – Islamic Equity Fund

The AmPRS – Islamic Equity Fund may invest its assets into a well-diversified portfolio comprising the following asset classes:

- Shariah Compliant Equities and/or Shariah Compliant equity-related securities;

The AmPRS – Islamic Equity Fund will invest in Shariah Compliant securities that are traded and/or listed in the local and foreign Eligible Markets.

For the Shariah Compliant equity portfolio, the Investment Manager will first analyse the general economic and market conditions. In an adverse market condition, the Investment Manager may increase the Fund’s asset allocation to lower risk assets such as Sukuk, Islamic money market instruments and/or Islamic deposits at the expense of the Shariah Compliant Equities and/or Shariah Compliant equity-related securities allocation (within the stipulated asset allocation), to safeguard the investment of the Fund.

The Shariah Compliant equity portfolio aims to mitigate fluctuations that are brought by investment sectors and market capitalization differences. The portfolio may thus be diversified across investment sectors and market capitalization.

“Risk of not meeting the Fund’s Investment Objective

This is the risk that the Fund may deviate from the intended investment objective, the Investment Manager may liquidate the investments in the Target Fund and hold 100% of the Fund’s NAV in cash, in order to protect the Members’ interest, under circumstances including but not limited to the following:

- (a) there is an adverse change to the regulatory and political regime in which the Target Fund operates;

THIS SECOND SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 31 AUGUST 2023 HAS TO BE READ IN CONJUNCTION WITH THE THIRD REPLACEMENT DISCLOSURE DOCUMENT FOR AmPRS DATED 2 APRIL 2021 AND THE FIRST SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 28 JULY 2021

- (b) there is a material change to the investment objective of the Target Fund; and
- (c) there is an unfavorable change to the feature of the Target Fund (e.g. fees, distribution policy).

Subsequently, the PRS provider and/or its delegates in consultation with the Trustee and the members of the committee undertaking the oversight function of the Fund will call for a Member's meeting to decide on whether to terminate the Fund or replace the Target Fund with a new target fund.

Note: A replacement of the Target Fund or termination of the Fund would require Members' approval.

Liquidity and Suspension Risk

The Fund will be investing a minimum of 85% of its assets in the Target Fund, while up to 15% of its assets will be invested in Liquid Assets which could be utilized to meet redemption requests. Liquidity risk refers to the ease of liquidating the underlying asset of the Target Fund depending on the volume traded in the market. Liquidity risk may cause the PRS Provider to dispose the units of the Target Fund at unfavourable price. Thus, the value of the Fund's investments would fall and subsequently the value of a Member's investments would be reduced. There may be exceptional circumstances, which could cause delays in the redemption of units of the Target Fund and units of the Fund. In the event of exceptional circumstance such as suspension of calculation of net asset value of the Target Fund, no units of the Target Fund will be redeemed and the Fund may be suspended. If the Fund is suspended, Members may not receive their redemption proceeds within the stipulated redemption timeline and their investments will continue to be subjected to the risk factors inherent to the Fund. For other exceptional circumstances where the PRS Provider may suspend dealings of Units in the Fund, please refer to Section 10.5 Temporary Suspension of Determination of NAV, Issue, Switching and Redemption of Units.

Related Party Transaction Risk

The Fund may invest in CIS managed by the PRS Provider. The Fund may also have other dealings with parties related to the PRS Provider. Hence, the Fund may be exposed to related party transaction risk, which in this context refers to the risk where the PRS Provider may make certain investment decision for the benefit of the Investment Manager and/or parties related to the PRS Provider which may be at a disadvantage to the Fund and/or the CIS. For example, the Fund may invest in CIS managed by the PRS Provider with the pricing policies, manner of settlement and/ or other terms of the transactions different from those with independent parties.

It is the PRS Provider's policy that all transactions with related parties are to be executed on terms which are not less favorable to the Fund than on arm's length transaction between independent parties. There are adequate segregation of duties to ensure proper checks and balances are in place in the areas of fund management, risk management, compliance, administration and marketing. In the unlikely event that the PRS Provider faces conflicts in respect of its duties to the Fund and its duties to other CIS that it manages, the PRS Provider is obliged to act in the best interests of all its Members and will seek to resolve any conflicts fairly and in accordance with the Deed.

The members of the committee undertaking the oversight function of the Fund will ensure the Fund is managed in the best interests of the Fund's Members."

Taxation of the Funds and Members

1. This letter has been prepared for inclusion in the Second Supplementary Disclosure Document (hereinafter referred to as “the Disclosure Document”) in connection with the offer of units in the abovementioned Funds (each of the Funds is referred to hereinafter as “the Fund”).

The following is general information based on Malaysian tax law in force at the time of lodging the Disclosure Document with the Securities Commission Malaysia (“SC”) and investors should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon a member’s individual circumstances. The information provided below does not constitute tax advice. The private retirement scheme (“PRS”) Provider therefore recommends that a member consult his accountant or tax adviser on questions about their respective tax position.

2. **Taxation of the Fund**

- 2.1 **Income Tax**

As the Fund’s Trustee is a tax resident in Malaysia, the Fund is regarded as a tax resident in Malaysia. The taxation of the Fund is governed principally by Sections 61 and 63B of the Malaysian Income Tax Act, 1967 (“MITA”).

The Scheme is an approved scheme under the MITA pursuant to Section 2 of the MITA. Section 2 defines approved scheme as the Employees Provident Fund, PRS or any pension or provident fund, scheme or society approved by the Director General of the Inland Revenue (“DGIR”) under Section 150 of the MITA. PRS is further defined as a retirement scheme approved by the SC in accordance with the Capital Markets and Services Act, 2007.

Based on the above, income received by the Fund of the Scheme is exempted from income tax (“income tax” or “tax”) pursuant to Paragraph 20 of Schedule 6 to the MITA.

- 2.2 **Domestic and Foreign Investments**

THIS SECOND SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 31 AUGUST 2023 HAS TO BE READ IN CONJUNCTION WITH THE THIRD REPLACEMENT DISCLOSURE DOCUMENT FOR AmPRS DATED 2 APRIL 2021 AND THE FIRST SUPPLEMENTARY DISCLOSURE DOCUMENT DATED 28 JULY 2021

On the basis that the Funds are PRS approved by the SC which is regarded as an approved scheme pursuant to Section 2 of the Act, the income of the Funds accruing in Malaysia or from overseas investments are exempt from tax under Paragraph 20, Schedule 6 of the MITA.

2.3 Gains on Disposal of Investments

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax ("RPGT") under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

2.4 Service Tax

The issuance of units by the Fund to investors will not be subject to Service Tax. Any distributions made by the Fund to Members are also not subject to Service Tax. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007.

To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

If the Fund acquires any imported taxable services from a service provider outside of Malaysia, these services would be subject to 6% Service Tax. The Fund would be required to file an SST-02A return on an ad hoc basis and report and pay this amount of tax to the Royal Malaysian Customs Department.

3. Taxation of Members

3.1 Distribution of Profits Received by Members

The amount determined by the PRS Provider to be distributed shall be distributed to all members in proportion to the number of units held by them in the Fund as of the date that the distribution is declared. The distribution shall be effected by the creation of additional units of the Fund in favour of and to the credit of the member. Distribution of profits to the members in the form of units is exempt from income tax in their hands.

Distribution of income in the form of units of the Fund to member which are reinvested in the PRS are not liable to tax as the member does not made any withdrawals from the Fund.

3.2 Withdrawal from the Scheme

Pursuant to Section 109G of the MITA, where withdrawal of contributions from the Scheme by a member is made prior to the member attaining the age of 55 (other than by reason of permanent total disablement, serious disease, mental disability, death or permanently leaving Malaysia) the amount of contribution withdrawn will be taxed at the rate of 8%. The PRS Provider is required to deduct tax at the rate of 8% from the withdrawn amount before making payment to the member. The tax withheld has to be remitted to the DGIR within one month after making the payment to the member. In the event that the PRS Provider fails to remit any amount of the tax withheld, a penalty of a sum equivalent to 10% of the amount not remitted shall be imposed on the PRS Provider and the increased sum shall be a debt due from the PRS Provider to the government.

3.3 Switching Fund

If a member switches a fund to another fund either managed by the same or a different PRS provider, no withholding tax would be imposed as the member does not make any withdrawal in cash when the switch is made.

3.4 Sale, Transfer or Redemption of Units

Any gains realised by a member on the sale, transfer or redemption of his units are generally tax-free capital gains unless the member is an insurance company, a financial institution or a person trading or dealing in securities. Generally, the gains realised by these categories of members constitute business income on which tax is chargeable.

3.6 Reinvestment of Distribution

Members who receive their income distribution by way of investment in the form of the purchase of new units will be deemed to have received their income distribution after tax and reinvested that amount in the Fund.

3.7 Unit Splits

Unit splits issued by the Fund are not taxable in the hands of the members.

3.8 Service Tax

Pursuant to the Lampiran A of the First Schedule of the Service Tax Regulations 2018 ("First Schedule"), only taxable services listed in the First Schedule are subject to service tax. This excludes any investment income or gains received by the member as such income and gains are not prescribed taxable services.

The legal fees, consultant fees and management fees may be subject to service tax at 6% if the service providers are registered for Services Tax. Effective from 1 January 2019, the imposition and scope of service tax has been widened to include any imported taxable service.

4. Tax Relief of a Member and Deduction on Contributions by Employers to the Scheme

Pursuant to Section 49(1D) of the MITA, a member who is tax resident for the basis period for a year of assessment ("YA") is entitled to a tax relief of up to RM3,000 in respect of contributions made to a PRS or deferred annuity. This is effective from YA 2012 and extended until YA 2025.

Employers are given a tax deduction of up to 19% of the employees' remuneration under Section 34(4) of the MITA for contributions made by the employers to an approved scheme which is defined in (2.1) above. The tax deduction on contributions made by employers on behalf of employees to a PRS is effective from YA 2012.

With respect to employers' contributions to a PRS on behalf of employees that are subject to a vesting schedule, upon termination of employment of an employee, unvested benefits (to which the employee is not entitled in the member's account) returned to the employer may be subject to tax in the hands of the employer pursuant to Section 22(2) of the MITA.

We hereby confirm that the statements made in this tax adviser letter correctly reflect our understanding and the interpretation of the current Malaysian tax legislations and the related interpretation and practice thereof, all of which may subject to change. Our comments above are general in nature and cover taxation in the context of Malaysian tax legislation only and do not cover foreign tax legislation. The comments do not represent specific tax advice to any investors and we recommend that investors obtain independent advice on the tax issues associated with their investments in the Fund.

Yours faithfully

THERE ARE FEES AND CHARGES INVOLVED AND POTENTIAL MEMBERS ARE ADVISED TO CONSIDER THEM BEFORE CONTRIBUTING IN FUNDS UNDER THE SCHEME.

UNIT PRICES AND DISTRIBUTIONS PAYABLE, IF ANY, MAY GO DOWN AS WELL AS UP. PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE.

FOR INFORMATION CONCERNING CERTAIN RISK FACTORS WHICH SHOULD BE CONSIDERED BY PROSPECTIVE MEMBERS, SEE RISK FACTORS COMMENCING ON PAGE 18.

4. RISK FACTORS

All investments carry some degree of risk. The role of the investment manager in a fund is to choose assets and mitigate risks as much as possible while working to achieve the investment objective of the fund.

Therefore, before making an investment decision, Members should consider the different types of risk that may affect the Fund under the Scheme or the Member individually.

4.1 GENERAL RISKS OF INVESTING IN THE FUND(S) UNDER THE SCHEME

Market Risk

This is the risk of prices of assets falling in response to general market factors as opposed to company-specific factors, which may affect the Fund's underlying investments and hence the NAV of the Fund. Factors influencing the performance of markets include:

- (a) Economic factors such as changes in interest rates, inflation and foreign exchange rates;
- (b) Socio-political environment;
- (c) Regulatory factors; and
- (d) Broad investor sentiment.

Inflation Risk

This is the risk that Members' investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

Investment Manager Risk (except for AmPRS – Tactical Bond and AmPRS – Dynamic Sukuk)

This is the risk of the Investment Manager making poor investment decisions which may adversely affect the performance of the Fund. Poor investment decisions could be due to incorrect view of markets or because of the chosen investment style.

Country Risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the net asset value or prices of units to fall.

Non-Compliance Risk

This is the risk of the PRS Provider, its delegates or the Trustee not complying with their respective internal policies, the Deed and its Supplemental Deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the Fund when the Investment Manager takes action to rectify the non-compliance. For example, non-compliance could occur due to internal factors such as human error or shortfalls in operational and administrative processes, or external factors such as market movements.

This risk may be mitigated by having sufficient internal controls in place to ensure compliance with all applicable requirements at all times.

Capital and Returns Not Guaranteed

Investors should take note that the Fund under the Scheme is neither a capital guaranteed fund nor a capital protected fund. There is no guarantee of income distribution and capital appreciation.

4.2 SPECIFIC RISKS UNIQUELY ASSOCIATED WITH THE INVESTMENT PORTFOLIO OF THE FUND(S) UNDER THE SCHEME

Specific risks uniquely associated with the investment portfolio of AmPRS – Growth Fund and AmPRS – Moderate Fund

Company Specific Risk

This is the risk of prices of securities falling due to circumstances affecting individual companies. If company-specific factors deteriorate, the prices of the respective securities held by the Fund may possibly decline over short or extended periods despite positive market conditions. As a consequence, the NAV of the Fund may be adversely affected.

This risk is mitigated via careful selection of securities as well as through diversification (by spreading investments and hence risk across a basket of securities).

Credit and Default Risk

Credit risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of profit or interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to issuer of a debt instrument either defaulting in payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Fund.

Interest Rate Risk

This is the risk of an increase in interest rates causing the value of fixed income instruments held by the Fund to generally decline. In particular, fixed income instruments with longer maturity and lower coupon/profit rates are more sensitive to interest rate changes, and are subject to greater interest rate risk compared to fixed income instruments with shorter maturities and higher coupon/profit rates.

In order to mitigate interest rate risk, the Investment Manager will need to manage the fixed income portfolio taking into account the coupon or profit rate and time to maturity of the fixed income instruments.

Risks associated with investment in REITs

Investing in REITs involves many of the same risks associated with direct ownership of real estate, including but not limited to possible declines in real estate's value, declines in real estate's ability in generating rental income, increase in interest rates, changes in property taxes and higher operating expenses, which may adversely affect the NAV of the Fund.

Liquidity Risk

Liquidity is defined as the ease with which securities can be bought or sold. This depends on the availability of buyers and sellers as well as the trading volume of securities in the market. The Fund holding investments that are illiquid or difficult to dispose of would be exposed to liquidity risk, which in this context refers to the inability of the Fund to take advantage of potentially better pricing that would be available if there were more buyers and the securities are more actively traded in the market.

Liquidity risk may be mitigated by investing in a portfolio of securities with reasonable* trading volumes and avoiding securities with poor liquidity.

* The Investment Manager determines what is deemed to be reasonable trading volume for the Fund.

Currency Risk

As the Fund may invest in foreign currency denominated securities (i.e. foreign investments), the Fund would be exposed to currency risk. This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Fund. When the currency of foreign investments depreciates against the base currency of the Fund, the NAV of the Fund will be adversely affected when the foreign investments are expressed in the base currency of the Fund.

The Investment Manager may at its discretion hedge the currency of its foreign investments against the base currency of the Fund to mitigate currency risk for the benefit of the Fund. Note that while hedging protects the Fund against depreciation in the currency of foreign investments against the base currency of the Fund, it also caps the Fund from benefiting from an appreciation in the currency of foreign investments against the base currency of the Fund.

Risk associated with the Default Option

Under Default Option, upon attaining the age group as stipulated in the PRS Guidelines, the PRS Provider will automatically redeem Members' units in the existing Core Fund and allocate Members' contribution into another Core Fund. For example, Members' units in AmPRS – Growth Fund will be switched to AmPRS – Moderate Fund when Members attain the age 45 years. At the point of switching, the NAV per unit of the AmPRS – Growth Fund may be lower than the NAV per unit of the AmPRS – Moderate Fund that the Members initially contributed into. Hence, Members may realize losses upon disposal of units held by the Members. However, the PRS Provider will notify the Members at least one (1) month before Members attaining the next age group, where Members are given an option to stay on at the particular Core Fund.

Specific risks uniquely associated with the investment portfolio of AmPRS – Conservative Fund

Company Specific Risk

This is the risk of prices of securities falling due to circumstances affecting individual companies. If company-specific factors deteriorate, the prices of the respective securities held by the Fund may possibly decline over short or extended periods despite positive market conditions. As a consequence, the NAV of the Fund may be adversely affected.

Default risk relates to issuer of a debt instrument either defaulting in payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Fund.

At the point of switching, the NAV per unit of the AmPRS – Moderate Fund may be lower than the NAV per unit of the AmPRS – Moderate Fund that the Members initially contributed into. Hence, Members may realize losses upon disposal of units held by the Members. Specific risks uniquely associated with the investment portfolio of AmPRS – Islamic Equity Fund, AmPRS – Islamic Balanced Fund and AmPRS – Islamic Fixed Income Fund

Company Specific Risk

This is the risk of prices of securities falling due to circumstances affecting individual companies. If company-specific factors deteriorate, the prices of the respective securities held by the Fund may possibly decline over short or extended periods despite positive market conditions. As a consequence, the NAV of the Fund may be adversely affected.

Default risk relates to issuer of a debt instrument either defaulting in payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Fund.

Interest Rate Risk

This is the risk of an increase in interest rates in the broader economy causing the value of fixed income instruments held by the Fund to generally decline. In particular, fixed income instruments with longer maturity and lower profit rates are more sensitive to interest rate changes, and are subject to greater interest rate risk compared to fixed income instruments with shorter maturities and higher profit rates.

In order to mitigate interest rate risk, the Investment Manager will need to manage the fixed income portfolio taking into account the profit rate and time to maturity of the fixed income instruments.

Note that the term structure of interest rate is a general economic indicator that will have an impact on the Fund. It does not in any way suggest that the Fund will invest in conventional financial instruments.

Risks associated with investment in REITs

Investing in REITs involves many of the same risks associated with direct ownership of real estate, including but not limited to possible declines in real estate's value, declines in real estate's ability in generating rental income, increase in interest rates, changes in property taxes and higher operating expenses, which may adversely affect the NAV of the Fund.

* The Investment Manager determines what is deemed to be reasonable trading volume for the Fund.

Currency Risk

As the Fund may invest in foreign currency denominated securities (i.e. foreign investments), the Fund would be exposed to currency risk. This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Fund. When the currency of foreign investments depreciates against the base currency of the Fund, the NAV of the Fund will be adversely affected when the foreign investments are expressed in the base currency of the Fund.

The Investment Manager may at its discretion hedge the currency of its foreign investments against the base currency of the Fund to mitigate currency risk for the benefit of the Fund. Note that while hedging protects the Fund against depreciation in the currency of foreign investments against the base currency of the Fund, it also caps the Fund from benefiting from an appreciation in the currency of foreign investments against the base currency of the Fund.

Shariah Non-Compliance Risk

This is the risk of the Fund not conforming to Shariah Investment Guidelines. The appointed Shariah Adviser for the Fund would be responsible for ensuring that the Fund is managed and administered in accordance with Shariah principles. Note that as the Fund can only invest in Shariah Compliant instruments, non-compliance may adversely affect the NAV of Fund when the rectification of non-compliance results in losses.

When an investment (i.e. equity security) of the Fund is reclassified from Shariah Compliant to Shariah non-Compliant, any losses due to rectification of non-compliance (i.e. disposal of the Shariah non-Compliant investment) will be assumed by the Fund. Losses could occur if the disposal of the Shariah non-Compliant investment is at a price lower than the initial purchase price of the previously Shariah Compliant investment.

If the non-compliance is due to active breach by the fund manager (i.e. buying a Shariah non-Compliant investment, then any capital gain received arising from the disposal of the Shariah non-Compliant investment shall be channeled to baitulmal and/or charitable bodies; however, if there is a loss arising from the disposal, the fund manager shall bear the loss.

Specific risks uniquely associated with the investment portfolio of AmPRS – Tactical Bond

Risk of a Passive Strategy

As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines. This is because the Fund is closely mirroring the performance of the Target Fund and will not be adopting any temporary defensive strategies in response to such declines. All investment decisions are left with the fund manager of the Target Fund.

Risk of not meeting the Fund's Investment Objective

This is the risk that the Fund may deviate from the intended investment objective, the Investment Manager may liquidate the investments in the Target Fund and hold 100% of the Fund's NAV in cash, in order to protect the Members' interest, under circumstances including but not limited to the following:

- (a) there is an adverse change to the regulatory and political regime in which the Target Fund operates;
- (b) there is a material change to the investment objective of the Target Fund; and
- (c) there is an unfavorable change to the feature of the Target Fund (e.g. fees, distribution policy).

Subsequently, the PRS provider and/or its delegates in consultation with the Trustee and Investment Committee of the Fund will call for a Member's meeting to decide on whether to terminate the Fund or replace the Target Fund with a new target fund.

Note: A replacement of the Target Fund or termination of the Fund would require Members' approval.

Income Distribution Risk

It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realized returns to enable income distribution. As per the SC Guidelines, distribution of income should only be made from realized gains or realized income.

Liquidity Risk

The Fund will be investing a minimum of 85% of its assets in the Target Fund, while up to 15% of its assets will be invested in Liquid Assets which could be utilized to meet redemption requests. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund. In the event of exceptional circumstance such as suspension of calculation of net asset value of the Target Fund, no shares of the Target Fund will be redeemed and hence, the Fund may be suspended.

Related Party Transaction Risk

The Fund may invest in CIS managed by the PRS Provider. The Fund may also have other dealings with parties related to the PRS Provider. Hence, the Fund may be exposed to related party transaction risk, which in this context refers to the risk where the PRS Provider may make certain investment decision for the benefit of the Investment Manager and/or parties related to the PRS Provider which may be at a disadvantage to the Fund and/or the CIS. For example, the Fund may invest in CIS managed by the PRS Provider with the pricing policies, manner of settlement and/ or other terms of the transactions different from those with independent parties.

It is the PRS Provider's policy that all transactions with related parties are to be executed on terms which are not less favorable to the Fund than on arm's length transaction between independent parties. There are adequate segregation of duties to ensure proper checks and balances are in place in the areas of fund management, risk management, compliance, administration and marketing. In the unlikely event that the PRS Provider faces conflicts in respect of its duties to the Fund and its duties to other CIS that it manages, the PRS Provider is obliged to act in the best interests of all its Members and will seek to resolve any conflicts fairly and in accordance with the Deed.

The Investment Committee members will ensure the Fund is managed in the best interests of the Fund's Members.

Specific risks uniquely associated with the investment portfolio of AmPRS – Asia Pacific REITs

Risks associated with investment in REITs

Investing in REITs involves many of the same risks associated with direct ownership of real estate, including but not limited to possible decline in real estate's value, decline in real estate's ability in generating rental income, increase in interest rates, changes in property taxes and higher operating expenses, which may adversely affect the NAV of the Fund.

Concentration Risk

This is the risk that the Fund may be concentrated in a few sectors, countries and/or regions. As such, developments affecting that sector may affect the NAV of the Fund more adversely as compared to the scenario where the Fund is more diversified across many sectors, countries and/or regions.

This risk may be mitigated by diversifying the investment across several sectors, countries and/or regions.

Income Distribution Risk

It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realized returns to enable income distribution. As per the SC Guidelines, distribution of income should only be made from realized gains or realized income.

Currency Risk

As the Fund may invest in foreign investments (i.e. foreign currency denominated CIS), the Fund would be exposed to currency risk. This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Fund. When the currency of foreign investments depreciates against the base currency of the Fund, the NAV of the Fund will be adversely affected when the foreign investments are expressed in the base currency of the Fund.

Note that while hedging protects the Fund against depreciation in the currency of foreign investments against the base currency of the Fund, it also caps the Fund from benefiting from an appreciation in the currency of foreign investments against the base currency of the Fund.

4.3 SPECIFIC RISKS ASSOCIATED WITH THE TARGET FUND

Specific risks associated with the Target Fund of AmPRS – Tactical Bond

Credit and Default Risk

Credit risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of profit or interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to issuer of a debt instrument either defaulting in payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Target Fund.

Interest Rate Risk

This is the risk of an increase in interest rates causing the value of fixed income instruments held by the Target Fund to generally decline. In particular, fixed income instruments with longer maturity and lower coupon/profit rates are more sensitive to interest rate changes, and are subject to greater interest rate risk compared to fixed income instruments with shorter maturities and higher coupon/profit rates.

In order to mitigate interest rate risk, the manager of the Target Fund will need to manage the fixed income portfolio taking into account the coupon or profit rate and time to maturity of the fixed income instruments.

Income Distribution Risk

It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, capital controls affecting investments in foreign countries, as well as unavailability of sufficient realized returns to enable income distribution (as per the Guidelines on Unit Trust Funds issued by the SC, distribution of income should only be made from realized gains or realized income).

Currency Risk

As the Target Fund may invest in foreign currency denominated securities (i.e. foreign investments), the Target Fund would be exposed to currency risk. This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Target Fund. When the currency of foreign investments depreciates against the base currency of the Target Fund, the NAV of the Target Fund will be adversely affected when the foreign investments are expressed in the base currency of the Target Fund.

The manager of the Target Fund may at its discretion hedge the currency of its foreign investments against the base currency of the Target Fund to mitigate currency risk for the benefit of the Target Fund.

Liquidity Risk

Liquidity is defined as the ease with which securities can be bought or sold. This depends on the availability of buyers and sellers as well as the trading volume of securities in the market. The Target Fund holding investments that are illiquid or difficult to dispose of would be exposed to liquidity risk, which in this context refers to the inability of the Target Fund to take advantage of potentially better pricing that would be available if there were more buyers and the securities are more actively traded in the market.

Liquidity risk may be mitigated by investing in a portfolio of securities with reasonable* trading volumes and avoiding securities with poor liquidity.

* The manager of the Target Fund determines what is deemed to be reasonable trading volume for the Target Fund.

Related Party Transaction Risk

The Target Fund may invest in CIS managed by the manager. The Target Fund may also have other dealings with parties related to the manager. Hence, the Target Fund may be exposed to related party transaction risk, which in this context refers to the risk where the manager may make certain investment decision for the benefit of the manager and/ or parties related to the manager which may be at a disadvantage to the Target Fund and/or the CIS. For example, the Target Fund may invest in CIS managed by the manager with the pricing policies, manner of settlement and/ or other terms of the transactions different from those with independent parties.

It is the manager's policy that all transactions with related parties are to be executed on terms which are not less favorable to the Target Fund than on arm's length transaction between independent parties. There are adequate segregation of duties to ensure proper checks and balances are in place in the areas of fund management, risk management, compliance, administration and marketing. In the unlikely event that the manager faces conflicts in respect of its duties to the Target Fund and its duties to other CIS that it manages, the manager is obliged to act in the best interests of all its investors and will seek to resolve any conflicts fairly and in accordance with the deed.

The investment committee members will ensure the Target Fund is managed in the best interests of the Target Fund's investors i.e. the Fund which the PRS Member(s) invested in.

Specific risks associated with the Target Fund of AmPRS – Dynamic Sukuk

Credit and Default Risk

Credit risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to issuer of a debt instrument either defaulting in payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Target Fund.

Interest Rate Risk

This is the risk of an increase in interest rates causing in the broader economy the value of fixed income instruments held by the Target Fund to generally decline. In particular, fixed income instruments with longer maturity and lower profit rates are more sensitive to interest rate changes, and are subject to greater interest rate risk compared to fixed income instruments with shorter maturities and higher profit rates.

In order to mitigate interest rate risk, the manager of the Target Fund will need to manage the fixed income portfolio taking into account the profit rate and time to maturity of the fixed income instruments.

Note that the term structure of interest rate is a general economic indicator that will have an impact on the Target Fund. It does not in any way suggest that the Target Fund will invest in conventional financial instruments.

Liquidity Risk

Liquidity is defined as the ease with which securities can be bought or sold. This depends on the availability of buyers and sellers as well as the trading volume of securities in the market. The Target Fund holding investments that are illiquid or difficult to dispose of would be exposed to liquidity risk, which in this context refers to the inability of the Target Fund to take advantage of potentially better pricing that would be available if there were more buyers and the securities are more actively traded in the market.

Liquidity risk may be mitigated by investing in a portfolio of securities with reasonable* trading volumes and avoiding securities with poor liquidity.

* The manager of the Target Fund determines what is deemed to be reasonable trading volume for the Target Fund.

Emerging Market Risk

The Target Fund may be investing in securities in emerging markets which may be subject to higher political risks, regulatory risks and liquidity risks compared to these risks in developed markets. Due to many emerging markets undergoing rapid growth, there are less regulations and there may

be less public information about these securities in such markets as compared to other markets. Investors would have to take into consideration that trading volume in emerging markets may be substantially less than the developed markets and the Target Fund may have to trade at unfavorable prices at that point of time. Investments in emerging markets are also subject to repatriation risks. Many emerging markets have restricted foreign investment policies although liberalization continues. Emerging markets may not have fully developed custodian and settlement services and therefore investments in such markets are subject to a greater degree of risk.

Currency Risk

As the Target Fund may invest in foreign currency denominated securities (i.e. foreign investments), the Target Fund would be exposed to currency risk. This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Target Fund. When the currency of foreign investments depreciates against the base currency of the Target Fund, the NAV of the Target Fund will be adversely affected when the foreign investments are expressed in the base currency of the Target Fund.

The manager of the Target Fund may at its discretion hedge the currency of its foreign investments against the base currency of the Target Fund to mitigate currency risk for the benefit of the Target Fund.

Shariah Non-Compliance Risk

This is the risk of the Target Fund not conforming to Shariah Investment Guidelines. The appointed Shariah Adviser for the Target Fund would be responsible for ensuring that the Target Fund is managed and administered in accordance with Shariah Investment Guidelines. Note that as the Target Fund can only invest in Shariah Compliant instruments, non-compliance may adversely affect the NAV of Target Fund when the rectification of non-compliance results in losses.

If the non-compliance is due to active breach by the fund manager (i.e. buying a Shariah non-Compliant investment), then any capital gain received arising from the disposal of the Shariah non-Compliant investment shall be channeled to baitulmal and/or charitable bodies; however, if there is a loss arising from the disposal, the fund manager shall bear the loss.

Related Party Transaction Risk

The Target Fund may invest in CIS managed by the manager. The Target Fund may also have other dealings with parties related to the manager. Hence, the Target Fund may be exposed to related party transaction risk, which in this context refers to the risk where the manager may make certain investment decision for the benefit of the manager and/ or parties related to the manager which may be at a disadvantage to the Target Fund and/or the CIS. For example, the Target Fund may invest in CIS managed by the manager with the pricing policies, manner of settlement and/ or other terms of the transactions different from those with independent parties.

It is the manager's policy that all transactions with related parties are to be executed on terms which are not less favorable to the Target Fund than on arm's length transaction between independent parties. There are adequate segregation of duties to ensure proper checks and balances are in place in the areas of fund management, risk management, compliance, administration and marketing. In the unlikely event that the manager faces conflicts in respect of its duties to the Target Fund and its duties to other CIS that it manages, the manager is obliged to act in the best interests of all its investors and will seek to resolve any conflicts fairly and in accordance with the deed.

The investment committee members will ensure the Target Fund is managed in the best interests of the Target Fund's investors i.e. the Fund which the PRS Member(s) invested in.

Note: The above mentioned risks which Members should consider before contributing into the Scheme and Funds under the Scheme should not be considered to be an exhaustive list. Members should be aware that investments in the Fund(s) under the Scheme may be exposed to other unforeseeable risks from time to time.

However, the tax penalty is not applicable for withdrawals due to death of a Member, permanent departure of a Member from Malaysia, permanent total disablement, serious disease, mental disability of a Member, for healthcare purposes or for housing purposes.

However, where an employer makes a contribution on behalf of an employee, the vested units may be maintained in Sub-Account A only.

The risk management strategies and techniques employed will be at the Target Fund level, where the investment manager of the Target Fund combines financial techniques and instruments to manage the overall risk of the Target Fund's portfolio as described on page 44.

AmPRS – Asia Pacific REITs

As part of its risk management strategy, the Fund is managed in such that there is sufficient portfolio diversification i.e. spreading risk across sub-sectors (for example, residential, commercial, industrial within the REITs sector) listed in various countries which have low or negative correlations with one another. Notwithstanding the aforesaid, in times of adversity in REITs markets, the Investment Manager may reduce its portion of higher risk asset i.e. REITs and increase its asset allocation to lower risk assets, i.e. liquid assets, to safeguard the investment portfolio of the Fund provided that such investments are within the investment objective of the Fund. When deemed necessary, the Investment Manager may also utilize derivative instruments, subject to the SC Guidelines, for purpose of hedging.

In addition, the risk management team applies rigorous risk management controls over investment portfolio including asset allocation, liquidity, adherence to investment objectives and investment parameters, valuation, monitoring performance etc. The risk management team is responsible for monitoring and controlling risks and reports directly to the board of directors.

When deemed necessary, AIFM may also utilize hedging instruments, subject to the Guidelines on Unit Trust Funds issued by the SC.

Information on the PPA can be obtained from <http://www.ppa.my>. Potential Members can also compare the fees and charges of other private retirement schemes by visiting this website.

Note: Unless stated otherwise, all fees, charges and/or expenses disclosed in the Third Replacement Disclosure Document are exclusive by way of example and not limitation; goods and services tax, value added tax, consumption tax, levies, duties and other taxes as may be imposed by the Government of Malaysia from time to time (collectively known as "Taxes"). If these fees, charges and/or expenses are subject to any Taxes, such Taxes shall be borne and payable by the Member and/or the Fund(s) under the Scheme (as the case may be) at the prevailing rate, including any increase or decrease to the rate, in addition to the fees, charges and/or expenses stated herein.

9.3 ONGOING FEES AND EXPENSES

The fees and expenses that you may indirectly incur are as follow:

(a) Annual Management Fee

A management fee is charged for managing the Fund. The management fee is calculated and accrued on a daily basis and will be paid monthly.

An illustration of the calculation and apportionment of the daily management fee is as follows:

Formula:

Management fee for the day = NAV attributable to this Class of units of the Fund x Management fee rate of the relevant Class (%) x 1/365 days

	Class D RM	Class I RM
NAV	100,000,000	50,000,000
Annual management fee	1.50%	1.25%
Management fee for the day	$\frac{100,000,000 \times 1.50\%}{365 \text{ days}}$	$\frac{50,000,000 \times 1.25\%}{365 \text{ days}}$
	= RM4,109.59 (rounded to 2 decimal points)	= RM1,712.33 (rounded to 2 decimal points)

Note: Where the Fund invests in target fund(s) managed by AmInvestment Group's FMD, there will be no double charging of management fee.

(b) PPA Administrative Fee

The PPA is entitled to an annual PPA administrative fee for acting as the administrator of the private retirement schemes. This fee is calculated and accrued on a daily basis and paid monthly. The PPA administrative fee is 0.04% p.a. of the NAV of the Fund.

An illustration of the PPA administrative fee per day is as follows:

Assuming the NAV of the Fund is RM100,000,000 and the PPA administrative fee is 0.04% p.a. of the NAV of the Fund. The daily accrued PPA administrative fee would be:-

$$\begin{aligned} \text{PPA administrative fee for the day} &= \text{NAV of the Fund} \times \text{PPA administrative fee of the Fund (\%)} \times 1/365 \text{ days} \\ &= \text{RM}100,000,000 \times 0.04\% \times 1/365 \\ &= \text{RM}109.59 \text{ (rounded to 2 decimal points)} \end{aligned}$$

(c) Annual Trustee Fee

The Trustee is entitled to an annual trustee fee for acting as trustee to safeguard the interest of Members and as custodian of the Fund's assets. This fee is calculated and accrued on a daily basis and paid monthly. The trustee fee is up to 0.04% p.a. of the NAV of the Fund.

An illustration of the trustee fee per day is as follows:

Assuming the NAV of the Fund is RM100,000,000 and the trustee fee is 0.04% p.a. of the NAV of the Fund. The daily accrued trustee fee would be :-

$$\begin{aligned} \text{Trustee fee for the day} &= \text{NAV of the Fund} \times \text{Trustee's fee rate of the Fund (\%)} \times 1/365 \text{ days} \\ &= \text{RM}100,000,000 \times 0.04\% \times 1/365 \\ &= \text{RM}109.59 \text{ (rounded to 2 decimal points)} \end{aligned}$$

(d) Fund's Expenses

The PRS Provider and Trustee may be reimbursed out of the Fund for any costs reasonably incurred in the administration of the Fund. The Fund's expenses currently include but are not limited to audit fee, tax agent's fee, printing and postages of annual and interim reports, bank charges, taxes and duties charge on the Fund by the relevant authority or government, investment committee fee for independent members, lodgement fee for Fund's reports (if any), sub-custodian fee (for foreign assets; if any), commission fee paid to brokers/ dealers (if any), Shariah Adviser's fee (where applicable), valuation fee of any investment of the Fund by an independent valuer, cost, fees and charges payable to PPA and other expenses as permitted by the Deed.

Note: Unless stated otherwise, all fees, charges and/or expenses disclosed in the Third Replacement Disclosure Document are exclusive by way of example and not limitation; goods and services tax, value added tax, consumption tax, levies, duties and other taxes as may be imposed by the Government of Malaysia from time to time (collectively known as "Taxes"). If these fees, charges and/or expenses are subject to any Taxes, such Taxes shall be borne and payable by the Member and/or the Fund(s) under the Scheme (as the case may be) at the prevailing rate, including any increase or decrease to the rate, in addition to the fees, charges and/or expenses stated herein.

Note: All the fees and charges above may be increased. A supplementary or a replacement disclosure document disclosing the new fees and charges will be issued should the fees and charges be increased. A notice period of 90 days will be given to the Members prior to the effective date of the new fees and charges, which is in accordance with the PRS Guidelines as may be amended and/ or updated from time to time.

This Third Replacement Disclosure Document replaces the Second Replacement Disclosure Document for AmPRS dated 7 October 2016, the First Supplementary Disclosure Document dated 7 November 2016, the Second Supplementary Disclosure Document dated 30 January 2018 and the Third Supplementary Disclosure Document dated 20 December 2018.

9.4 REBATES AND SOFT COMMISSION

It is our policy to channel all rebates, if any, received from brokers/dealers to the Fund. However, soft commissions received for goods and services which are of demonstrable benefit to Members and in the form of research and advisory services that assist in the decision making process relating to the Fund's investments as allowed under regulatory requirements and incidental to the investment management of the Fund and the dealing with the broker/dealer is executed on terms which are the most favorable for the Fund are retained by us.

There are fees and charges involved and Members are advised to consider them before contributing to a Fund under the Scheme.

10. TRANSACTION INFORMATION

10.1 PRICING AND VALUATION POINTS

The Fund adopts a single pricing policy i.e. which means purchase and redemption of units will be carried out at the NAV per unit. In addition, the Fund also adopts forward pricing which means price for units i.e. the NAV per unit will be calculated at the next valuation point after the complete documentation for purchase/ redemption is received. Sales charge and redemption charge (if any) will be computed and charged separately based on your purchase amount or amount redeemed. In circumstances where the prior authorization of the PPA is required, any application/ redemption of units will be at a price that is the NAV per unit of the Fund as at the next valuation point after the PPA's authorization is received by the PRS Provider.

Valuation point refers to such time(s) on a Business Day as may be decided by the PRS Provider wherein the NAV per unit of the Funds under the Scheme is calculated. The valuation for AmPRS – Conservative Fund will be carried out at least once a day at the end of each Business Day, whereas the valuation for AmPRS – Growth Fund, AmPRS – Moderate Fund, AmPRS – Islamic Equity Fund, AmPRS – Islamic Balanced Fund, AmPRS – Islamic Fixed Income Fund, AmPRS – Tactical Bond, AmPRS – Dynamic Sukuk and AmPRS – Asia Pacific REITs will be carried out on the next Business Day (T+1) by 5.00 p.m. This is because certain foreign markets in which the Funds may invest in have yet to close due to the different time zone of these countries. The currency conversion of the Fund's foreign portfolio to the base currency (RM) will be based on the bid foreign exchange rate quoted by Bloomberg/Reuters at 4.00pm (United Kingdom time) which is equivalent to Malaysian standard time of 11.00pm on the same day or 12.00am midnight, or such other time as stipulated from time to time in the Investment Management Standards issued by the Federation of Investment Managers Malaysia (FIMM).

In the event of any incorrect pricing of units of the Fund, the PRS Provider shall take immediate remedial action to rectify the incorrect pricing. Where the incorrect pricing:

- (i) is equal or more than zero point five per centum (0.5 %) of the NAV per unit; and
- (ii) results in a sum total of RM 10.00 or more,

then the PRS Provider shall reimburse the Fund and the affected Member as follows:

- (a) where the error is as a result of over valuation (i.e. the price quoted is higher than the actual price), the PRS Provider shall reimburse :
 - (i) the Fund (for the difference between the redemption amount paid out by the Fund and the amount per the amended valuation); and/or
 - (ii) the Member (for the difference between the value of subscription proceeds paid by the Member and the amount per the amended valuation);
- (b) where the error is as a result of under valuation (i.e. the price quoted is lower than the actual price), the PRS Provider shall reimburse:
 - (i) the Fund (for the difference between the value of subscription proceeds paid by the Member and the amount per the amended valuation) and/or
 - (ii) the Member (for the difference between the redemption amount paid out by the Fund and the amount per the amended valuation).

Subject to any regulatory requirements, the PRS Provider shall have the right to amend, vary or revise the above said limits or threshold from time to time.

Note: The NAV per unit for the Fund is rounded to four (4) decimal points. Redemption proceeds, units created, fees and charges are rounded to two (2) decimal points.

10.2 COMPUTATION OF NAV AND NAV PER UNIT

Members should take note that the NAV of the Fund is determined by deducting the value of all the liabilities of the Fund from the value of all the Fund's assets, at a particular valuation point.

The NAV per unit of a Class of units is the NAV of the Fund attributable to a Class divided by the number of units in circulation for that particular Class, at the same valuation point.

Note:

* - Day 1 is the launch date for the Fund

[^] - Multi-Class Ratio ("MCR") is apportioned based on the size of the Class relative to the whole Fund. This means the MCR is calculated by taking the value of Class before income & expenses for a particular day and dividing it with the value of the Fund before income & expenses for that same day. This apportionment is expressed as a ratio and calculated as a percentage.

⁺ - NAV of the Fund attributable to a Class of units at a particular valuation point divided by the number of units in circulation for that same Class, at the same valuation point:-

$$= \frac{\text{NAV of the particular Class of unit}}{\text{Units in circulation for the particular Class of units}}$$

- Creation/cancellation value for Day 3 above is based on purchase/redemption application received on Day 2.

15. APPROVALS AND CONDITIONS

The Securities Commission Malaysia has on 14 July 2014 approved AmFunds Management Berhad as a private retirement scheme provider under Section 139Q of the Act, subject to the following conditions:

- (a) successful merger of business of AmInvestment Management Sdn Bhd and AmFunds Management Berhad; and
- (b) AmFunds Management Berhad holds a Capital Markets Services Licence for the regulated activity of fund management in relation to portfolio management.

Paragraph (3) Schedule A1 of PRS Guidelines states that:

“Investment of core funds into one or more collective investment schemes of the same PRS Provider (target funds) is permitted for a five-year period from the launch of the Scheme or upon reaching RM200 million NAV (whichever is earlier) provided:

- (a) *The value of a core fund’s investment in any of the target fund(s) must not exceed 40% of the core fund’s NAV; and*
- (b) *That the investment objectives of the target fund(s) are similar to the core fund.”*

The Securities Commission Malaysia has on 14 November 2012 granted approval for a variation from the said guideline to allow the Core Funds to invest into one or more collective investment schemes of AmFunds Management Berhad, instead of just collective investment schemes of the same PRS provider provided that the fund management function of all selected retail collective investment schemes operated by AmFunds Management Berhad must be delegated to either AmInvestment Management Sdn Bhd or AmIslamic Funds Management Sdn Bhd.

We have also obtained an approval from the SC for the establishment of the Scheme and the authorisation for the Core Funds on 14 November 2012, subject to the following term and conditions:

- 1.1 Term of authorisation for the Core Funds
 - 1.1.1 The following are subject to the SC’s clearance during the registration of the Disclosure Document per item 1.2.5 below:

 - (b) Appointment of an audit committee for the Scheme;
 - 1.2.3 A deed of the Scheme (encompassing the Core Funds) which complies with the requirements of the PRS Guidelines, must be in force at all times;
 - 1.2.4 With regard to AmPRS – Conservative Fund, the following prohibitions and requirements must be complied with at all times;
 - (a) Investments in debentures/fixed income instruments must be rated at least BBB3/P2 by RAM (or equivalent rating by MARC). However, debentures/fixed income instruments which are rated below BBB3/P2 and/or are unrated, may comprise up to 5% of AmPRS – Conservative Fund’s NAV (“the 5% Limit”). In the event the 5% Limit is exceeded, whether as a result of:
 - i. A downgrade of any debenture/fixed income instrument to below BBB3/P2;
 - ii. An increase in the aggregate value of debentures/fixed income instruments which are rated below BBB3/P2 and/or are unrated; or
 - iii. A decrease in the NAV of AmPRS – Conservative Fund,
 AFM must reduce such investments to comply with the 5% Limit unless in the opinion of the Trustee, the disposal of such investments is not in the best interests of Members;
 - (b) Use of derivatives is for hedging purposes only;
 - (c) No investments in warrants except as a result of AmPRS – Conservative Fund’s holdings in equities;
 - (d) No investments in products with embedded derivatives;

 - 1.2.5 The Disclosure Document of the Scheme must be registered with the SC; and

Clause (10) of Schedule A, Guidelines on Private Retirement Schemes states that:

“Except for investments by core funds, the value of the fund’s investments in units/shares of any collective investment scheme must not exceed 20% of the fund’s NAV.”

Clauses (5)(a), (7) and (8) Schedule A – Appendix II, Guidelines on Private Retirement Schemes state that:

- (5) A Fund-of-Funds must not invest in - (a) a Fund-of-Funds.
- (7) A Fund-of-Funds must invest in at least five collective investment schemes at all times.
- (8) The value of a fund’s investments in units/shares of any collective investment scheme must not exceed 30% of the fund’s NAV.

- Taxation of the Scheme and Members

1. This letter has been prepared for inclusion in the Third Replacement Disclosure Document (hereinafter referred to as “the Disclosure Document”) in connection with the offer of units in the funds under the Scheme.

The following is general information based on Malaysian tax law in force at the time of lodging the Disclosure Document with the Securities Commission Malaysia (“SC”) and Members should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon a Member’s individual circumstances. The information provided below does not constitute tax advice. The Private Retirement Scheme (“PRS”) Provider therefore recommends that a Member consult his accountant or tax adviser on questions about his individual tax position.

2. Taxation of the Scheme

2.1 Income Tax

The Scheme is an approved scheme under the Malaysian Income Tax Act, 1967 (“MITA”) pursuant to Section 2 of the MITA. Section 2 defines approved scheme as the Employees Provident Fund, PRS or any pension or provident fund, scheme or society approved by the Director General of the Inland Revenue (“DGIR”) under Section 150 of the MITA. PRS is further defined as a retirement scheme approved by the SC in accordance with the Capital Markets and Services Act, 2007.

Pursuant to the Section 2(7) of the MITA, any reference to interest shall apply, mutatis mutandis, to gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah. The effect of this is that any gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah, will be accorded the same tax treatment as if they were interest.

Based on the above, any income received by the Funds of the Scheme is exempted from income tax (“income tax” or “tax”) pursuant to Paragraph 20 of Schedule 6 to the MITA.

2.2 Gains on Disposal of Investments

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax (“RPGT”) under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

2.3 Service Tax

The issuance of units by the Fund to Members will not be subject to Service Tax. Any distributions made by the Fund to Members are also not subject to Service Tax. The Fund would not be required to pay Service Tax on the acquisition of fund management services from the Fund Manager.

To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

If the Fund acquires any imported taxable services from a service provider outside of Malaysia, these services would be subject to 6% Service Tax. The Fund would be required to file an SST-02A return on an ad hoc basis and report and pay this amount of tax to the Royal Malaysian Customs Department.

3. Taxation of Members

3.1 Taxable Distribution

The amount determined by the PRS Provider to be distributed shall be distributed to all Members in proportion to the number of units held by them in the Fund as of the date that the distribution is declared. The distribution shall be effected by the creation of additional units of the Fund in favour of and to the credit of the Member.

Distribution of income in the form of units of the Fund to Member which are reinvested in the PRS are not liable to tax as the Member does not made any withdrawals from the Fund.

This Third Replacement Disclosure Document replaces the Second Replacement Disclosure Document for AmPRS dated 7 October 2016, the First Supplementary Disclosure Document dated 7 November 2016, the Second Supplementary Disclosure Document dated 30 January 2018 and the Third Supplementary Disclosure Document dated 20 December 2018

3.2 Withdrawal from the Scheme

Pursuant to Section 109G of the MITA, where withdrawal of contributions from the Scheme by a Member is made prior to the Member attaining the age of 55 (other than by reason of permanent total disablement, serious disease, mental disability, death, permanently leaving Malaysia, healthcare or housing, for which such withdrawal shall be in compliance with the criteria as set out in the relevant guidelines of the Securities Commission Malaysia) the amount of contribution withdrawn will be taxed at the rate of 8%. The PRS Provider is required to deduct tax at the rate of 8% from the withdrawn amount before making payment to the Member. The tax withheld has to be remitted to the DGIR within one month after making the payment to the Member. In the event that the PRS Provider fails to remit any amount of the tax withheld, a penalty of a sum equivalent to 10% of the amount not remitted shall be imposed on the PRS Provider and the increased sum shall be a debt due from the PRS Provider to the government.

3.3 Switching Fund

If a Member switches a fund to another fund either managed by the same or a different PRS provider, no withholding tax would be imposed as the Member does not make any withdrawal in cash when the switch is made.

3.4 Unit Splits

Unit splits issued by the Fund are not taxable in the hands of the Members.

4. Tax Relief and Deduction on Contributions to the Scheme

Pursuant to Section 49(1D) of the MITA, a Member who is tax resident for the basis period for a year of assessment is entitled to a tax relief of up to RM3,000 in respect of contributions made to a PRS or deferred annuity. This relief was given from year of assessment 2012 to year of assessment 2021. The aforesaid tax relief on contribution to PRS has been extended to another four (4) years of assessment (i.e. from year of assessment 2022 to year of assessment 2025).

Employers are given a tax deduction of up to 19% of the employees' remuneration under Section 34(4) of the MITA for contributions made by the employers to an approved scheme which is defined in (3.1) above. The tax deduction on contributions made by employers on behalf of employees to a PRS is effective from year of assessment 2012.

With respect to employers' contributions to a PRS on behalf of employees that are subject to a vesting schedule, upon termination of employment of an employee, unvested benefits (to which the employee is not entitled in the Member's account) returned to the employer may be subject to tax in the hands of the employer pursuant to Section 22(2) of the MITA.

Yours faithfully
