Possible Outcomes of Investing in the Fund

These risk factors, among others, may cause you to lose some or all of your investment.	Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund's Master Prospectus.
KEY RISKS	
<p>WHAT ARE THE KEY RISKS ASSOCIATED WITH THE FUND?</p>	Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund's Master Prospectus.
Security risk	
<ul style="list-style-type: none"> • Adverse price movements of a particular security invested by the Fund may adversely affect the Fund's NAV. 	

Countries or Foreign securities risk
<ul style="list-style-type: none"> The Fund invests in a target fund that is domiciled in Luxembourg and also invests in securities listed outside Luxembourg. Any changes in the economic fundamentals, social and political stability, currency movements and foreign investments policies in these foreign countries may have an impact on the prices of the securities that the Target Fund invests in and consequently may also affect the Fund's NAV.
Currency risk
<ul style="list-style-type: none"> As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment. The impact of the exchange rate movement between the base currency of the Fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the base currency of the Fund.
Credit or Default risk
<ul style="list-style-type: none"> This risk refers to the inability of the issuer of the fixed income securities held by the Fund to make the coupon or principal payments when due. In the event the issuer defaults in the coupon or principal payments, the value of the Fund will be adversely affected.
Interest rate risk
<ul style="list-style-type: none"> Generally, the value of fixed income securities will move inversely to interest rate movements. Therefore, the value of fixed income securities may fall when interest rates rise and vice versa. Fixed income securities of longer duration tend to be more sensitive to interest rate changes.

Please be advised that if you invest in Units through an Institutional Unit Trust Scheme Adviser (IUTA) which adopts the nominee system of ownership, you would not be considered to be a Unit Holder under the Deed and you may, consequently, not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's Meeting and to vote thereat and the right to have your particulars appearing in the register of Unit Holders of the Fund).
