PRODUCT HIGHLIGHTS SHEET

KAF VISION FUND

Name of Fund	KAF Vision Fund.
Fund Category	Equity.
Fund Type	Growth.
Commencement Date	1 March 2000.
Capital Protected / Guaranteed	No.

PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

This Fund is suitable for investors who:

- are willing to adopt a fairly aggressive approach towards investing;
- are willing to accept a higher level of risk in order to obtain higher growth of capital; and
- have a medium to long-term investment horizon of three (3) to five (5) years or more.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

The Fund's investment objective is to provide Unit Holders with medium to long-term capital growth.

Investment Strategy

Investment policy and strategy

Asset allocation:

The strategic limit on asset allocation of the Fund is as follows:

Equities	Minimum 70% and maximum 95% <ul style="list-style-type: none"> • Maximum 65% of the Fund's NAV will be invested in smaller capitalised companies with market capitalisation not exceeding RM1 billion at the time of purchase. • Maximum 30% of the Fund's NAV will be invested in larger capitalised companies with market capitalisation exceeding RM1 billion at the time of purchase.
Fixed-income securities and liquid assets	Minimum 5% and maximum 30%

The process begins with a top-down view for asset allocation decisions and a bottom-up view for stock selection.

The asset allocation strategy is dependent on the state of the macro picture as perceived by the Manager after going through a strict investment process to review the outlook of the economy, stock and money markets over the medium to long-term horizon. This entails relevant analysis on economy and business statistics in order to produce forecasts for stock market and interest rates directions. The Manager adopts an active asset allocation policy and will time the investment strategies to suit market developments and global economic conditions. Where necessary, the Manager will increase / decrease the equity exposure appropriately between equities, bonds and money market instruments. The equity exposure of the Fund is expected to be within 70% to 95% in normal economic and investment circumstances.

The above asset allocation policy of the Fund may be reviewed from time to time based on the general market and economic situations.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse market conditions, economic or political market conditions. This defensive position may take the form of holding a significantly higher amount of liquid assets/cash and/or money market instruments. The Manager will then decide on the best appropriate asset allocation strategy and reallocate the

Fund's equity investment into other more defensive investments. The weighting for equity investments then may be scaled down to not less than 20% of the Fund's NAV.

For **equity securities**, the Fund will invest primarily in the common stocks of Malaysian companies that have the potential to grow steadily. In the selection process, the Manager will consider the price, risk, growth prospects, management quality, competitive position and prospects for investment return. The Manager will preferably concentrate on companies with the following characteristics:

- Focused and competent top management;
- Comparatively low gearing;
- Markets leaders in growing industries, with significant competitive advantages;
- High earning growth potential;
- Low stock valuation in relation to book values and earnings.

The Manager will conduct both on site company visits and financial analysis to determine the suitability of potential investments. In addition, the Manager will also take advantage of any special situation and mispricing opportunities in the market place. These opportunities generally represent short to medium-term inefficiencies in the market that are subsequently corrected to its fair value over the longer term.

Companies offering the best growth prospects over the longer term horizon tend to be small to medium-sized companies. Hence, to achieve the Fund's objective of attaining maximum capital growth in the long-term, the Fund's portfolio will have a significantly higher equities exposure in companies with market capitalisation of not more than RM1 billion at the time of purchase and above-average earnings growth.

While the Fund's primary objective is to invest in small to medium-sized companies, which would potentially realise faster earnings growth than the overall market, investments will also be made in larger capitalised companies with good earnings, growth prospect and attractive valuations. Depending on the view taken on the market, the Manager may reallocate the equity mix between the small-cap and larger cap stocks with the aim to enhance the Fund's return. For example, the Manager has the option to raise its larger cap stocks to a maximum of 30% of the Fund's NAV to take advantage of a rise in larger cap stocks, while maintaining between 30% and 65% of NAV in small-cap stocks. Similarly, the Manager may also have the option to scale down the larger cap stocks to of at least 5% of the Fund's NAV while maintaining 65% of the Fund's NAV in the smaller cap stocks.

Below is an illustration on combination of equity mix between the small-cap and large-cap stocks in a bearish and bullish market.

Market view	Bearish	Bullish
Small-caps	30% - 65 % of NAV	65% of NAV
Large-caps	5% - 30 % of NAV	30% of NAV
Total equity exposure	70% (minimum) of NAV	95% (maximum) of NAV

To mitigate risks, the Manager may also invest (when necessary) in futures and options contracts to hedge against market volatility and protect the Fund's value. Futures contract will only be used to hedge against the Fund's equity exposure from any unexpected price movements in the underlying market. For the purposes of the Fund's investment in derivatives, the global exposure will be calculated using commitment approach to ensure it does not exceed the Fund's NAV. The global exposure of the Fund to derivatives is calculated as the sum of the:

- absolute value of the exposure of each individual derivative not involved in netting or hedging arrangements;
- absolute value of the net exposure of each individual derivative after netting or hedging arrangement; and
- the values of cash collateral received pursuant to the reduction of exposure to counterparties of over-the-counter (OTC) derivatives.

The Manager will ensure that any funds not invested in equities will be invested in fixed-income securities and money market instruments.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

Specific risks of the Fund

- **Specific stock risk**

Specific stock risk can be associated with the shift in consumer taste, advertising campaigns, lawsuits and competitive industry conditions. It can be mitigated by diversifying the Fund's investment over more companies in various segments of the economy, which operate independently from one another. Failing to achieve the expected earnings would result in the stock price declining, which in turn will affect the performance of the Fund. Specific stock risk is mitigated by exercising prudence in stock selection.

- **Small capitalisation companies risk**

Investments in small capitalisation companies would require due considerations because of, for example, less public information, more limited financial resources and product lines, higher risk of failure than larger companies and lack of business operational history of such company. Any adverse events may result in greater volatility in the securities prices of the small capitalisation companies than normally experienced by larger capitalisation companies. Moreover, the trading volume of security for small capitalisation companies are generally low that may require a longer time period for acquisition or disposal.

Please be advised that if a Unit Holder invests in units through an IUTA which adopts the nominee system of ownership, the Unit Holder would not be considered to be a Unit Holder under the deed and the Unit Holder may consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat and the right to have the Unit Holder's particulars appearing in the register of Unit Holders of the Fund).

Performance review:

For the latest financial year, the Fund recorded a return of 17.79% whilst the benchmark recorded a return of 11.06%. The Fund's outperformance is largely due to exposure to the energy and utilities sector which outperformed the broad market.

Since its inception, the Fund recorded a total return of 818.81% whilst its benchmark recorded a total return of 61.90%.

Distribution record:

There were no distributions, bonuses or splits for the Fund for past three financial years.

Portfolio turnover ratio (PTR)

	Financial year ended 31 March		
	2024	2023	2022
PTR	0.38 times	0.67 times	0.73 times

The PTR for the latest financial year was lower than the previous financial year due to the decrease in portfolio rebalancing activities undertaken by the Fund.

VALUATIONS AND EXITING FROM INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

The Fund will be valued at least once every Business Day. The valuation of the Fund will be conducted at the close of Bursa Malaysia for that Business Day.

From time to time, Unit Holders will be able to obtain the unit price of the Fund as published in the major newspaper and at our website, www.kaf.com.my to monitor their investments. Unit Holders may also obtain the latest NAV per unit by contacting the Manager directly.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

Unit Holders may redeem their investments in the Fund by completing the prescribed repurchase request form and returning it to the Manager before the cut-off time of 4:00 p.m. on a Business Day. Any repurchase request received after 4:00 p.m. on a Business Day, will be considered to be received on the next Business Day.

There are no restrictions on the number of units a Unit Holders can redeem out of his investments and no restrictions on the repurchase frequency.

If following a repurchase request leaves the Unit Holder with less than 500 units or such other lower quantity as the Manager may decide from time to time (the minimum investment balance), the Manager has the option to liquidate the balance of the units held in the Unit Holder's account and forward the proceeds to the Unit Holder.

Repurchase proceeds will be paid within seven (7) Business Days from the date on which the repurchase request is received by the Manager.
