KEY RISKS

6. What are the key risks associated with this product?

Investors are advised to read the Fund's prospectus and understand the risks involved and if necessary, consult a professional adviser for a better understanding of the risks before investing.

General Risks related to the Fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If a fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund and consequently the value of unit holders' investments in the fund will be negatively affected when it has to sell such assets at unfavourable prices.

Compliance of regulations imposed by the Capital Markets and Services Act 2007 and the guidelines, deed prospectuses and/or manager's internal policies and procedures by the manager. Risk of non-compliance can leg to diminished reputation, reduced franchise value, limited business opportunities and reduced expansion potential for the company. Accordingly, non-compliance may affect the investor's investments by causing a fail in the value of th unit trust fund. Loan This risk occurs when investors take a loar/financing to finance their investments by causing a fail in the value of th unit trust fund. Loan This risk occurs when investors take a loar/financing to finance their investments by causing a fail in the value of th unit trust fund. Suspension of Risk This risk occurs when investors take a loar/financing to finance their investment if the prices of units fail be only the fund's asset value per unit at the point of purchase towards settling the loan. Suspension of Risk The repurchase of units of a fund may be suspended under exceptional circumstances, where the fair value, are unit at the point of purchase investment. The repurchase fund in the tasset value per unit at the point of purchase towards settling the loan. Risk Credit risk relates to the creditworthiness of the link. Any adverse situation the object of the fund's asset value per unit at the point of purchase refer to Section 7.7 of the Master Prospect for more information on suspension of dealing in Units. Specific Risks related to the Fund Credit risk relates to the creditworthiness of the issuers of the fixed income securities/sukuk or money mark instruments/ heritand/or pricing. Any adverses	Non-	This is the risk that investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.					
Financing Risk borrowed money includes investors being unable to service the loan repayments. In the event units are used a collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fail below a certain level due to market conditions. Failing which, the units may be sold at a fourment asset value per units as compared to the net asset value per units at the point of purchase towards setting the loan. Suspension of Repurchase The repurchase of units of a fund may be suspended under exceptional circumstances, where the fair value as compared to the net asset value per unit at the point of purchase towards setting the loan. Risk The repurchase of units of a fund may be suspended under exceptional circumstances, where the fair value or a material pontion of the find's assets canno be reasonably determined. Upon suspension, the fund will not be able to be subjected to the hist factors in intervent and unit holders investments we continue to be subjected to the find. Predit and The repurchase of units of a fund may be suspended under exceptional circumstances, where the fair value or continue to be subjected to the find. Credit and Credit risk relates to the creditworthiness of the insuer and unit holders investments we continue to be subjected to a many adverse situation fanded by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment. This could adversely affect the value of the Fund Tredit and Credit risk relates to the creditworthiness of the investment. This could adversely affect the value of the Fund. Interest Rate Interest rate fails relate investment entintere	•						
Repurchase Risk a material portion of the fund's assets cannot be reasonably determined. Upon suspension, the fund will not be able to pay unit holders' repurchase proceeds in a timely manner and unit holders will be compelled to remain invested the fund for a longer period of time than the sitpulated repurchase timeline. Hence, unit holder's investments w continue to be subjected to the risk factors inherent to the fund. Please refer to Section 7.7 of the Master Prospect for more information on suspension of dealing in Units. Pecific Risks related to the Fund Credit risk relates to the creditworthiness of the issuers of the fixed income securities/sukuk or money market instruments/slamic money market instruments (hereinafter referred to as "investment") and their expected ability make timely payment of interestyprofit and/or principal. Any adverse situation faced by the issuer may impact the valu as well as liquidity of the investment. In the case of rate divestment, this may lead to a credit downgrade. Default its relates to the risk that an issuer of the investment in the case of rate divestment, this may lead to a credit downgrade. Default its reverse may apply when interest rate changes on the valuation of a bond/sukuk or money mark rist. The investment prices will generally decline and this may lower the investment profidio. The reverse may apply when interest rates fall. The risk will be mitigated via the management of the duration structure the investment. Please be advised that if you invest in Units through an institutional unit trust scheme adviser which adopts the nomil system of ownership, you would not be considered to be a Unit Holder under the decad and consequently do not have all ights ordinarity exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat the right to have your particulars appearing		This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.					
Credit and Default Risk Credit risk relates to the creditworthiness of the issuers of the fixed income securities/sukuk or money mark instruments/lslamic money market instruments (hereinafter referred to as "investment") and their expected ability make timely payment of interest/profit and/or principal. Any adverse situation faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default in relates to the risk that an issuer of the investment either defaulting on payments or failing to make payments in a time manner which in turn adversely affect the value of the fivestment. This could adversely affect the value of the Fund. Interest Rate Risk Interest rate risk refers to the impact of interest rate changes on the valuation of a bond/sukuk or money mark instruments/lslamic money market instruments (hereinafter referred to as "investment") portfolio. When interest ra- rise, the investment prices will generally decline and this may lower the market value of the fundue of the duration structure the investment. Please be advised that if you invest in Units through an institutional unit trust scheme adviser which adopts the nomi system of ownership, you would not be considered to be a Unit Holder under the deed and consequently do not have all tights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat a he right to have your particulars appearing in the register of Unit Holder of a fund Holder's meeting and to vote thereat a he right to have solution of the Fund. Sales Charge Nil Repurchase Charge Nil Rowing Fee Nil Other Charges	Repurchase	The repurchase of units of a fund may be suspended under exceptional circumstances, where the fair value of a material portion of the fund's assets cannot be reasonably determined. Upon suspension, the fund will not be able to pay unit holders' repurchase proceeds in a timely manner and unit holders will be compelled to remain invested in the fund for a longer period of time than the stipulated repurchase timeline. Hence, unit holder's investments will continue to be subjected to the risk factors inherent to the fund. Please refer to Section 7.7 of the Master Prospectus					
Default Risk Order hisk relates to the deduktion intermentative referred to as "investment") and their expected ability make timely payment of interest/profit and/or principal. Any adverse situation faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default in relates to the risk that an issuer of the investment. This could adversely affect the value of the Fund. Interest Rate Interest rate risk refers to the impact of interest rate changes on the valuation of a bond'sukuk or money market instruments (learning on payments or falling to make payments in a time manner which in turn adversely affect the value of the investment. This could adversely affect the value of the Fund. Please be advised that if you invest in Units through an institutional unit trust scheme adviser which adopts the nomistructure the investment. Please be advised that if you invest in Units through an institutional unit trust scheme adviser which adopts the rominity of on thave all ights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote there at the right to have your particulars appearing in the register of Unit Holders of the Fund. 9. How do I exit from this investment and what are the risks and costs involved

Unit Holders may redeem their investments in the Fund on any Business Day by completing the prescribed repurchase request form or such other manner as the Manager may accept and returning it to the Manager or through its appointed agents on any Business Day; the repurchase request form is available at the office of the Manager.

Units redeemed during dealing hours (i.e. from 8.30 a.m. to 4.00 p.m.) on any Business Day will be redeemed at the NAV per Unit calculated as at the next valuation point after the request is received (i.e. "forward pricing").

Any redemption request received after the dealing hours on any Business Day will be taken as a redemption request made on the next Business Day.

The minimum redemption amount is 500 Units for each transaction or such other lower amount as the Manager in its sole discretion allows.

However, if the redemption request leaves a Unit Holder with less than 500 Units (minimum holdings), the Manager reserves the right to liquidate the balance of the Units held in the Unit Holder's account.

Redemption proceeds will be paid within seven (7) Business Days from the date the Manager receives a duly completed repurchase request form.

Cooling-Off Right

A cooling-off right is only given to an individual investor who is investing for the first time in any unit trust funds managed by the Manager but shall not include the Manager's staff and a person registered with a body approved by the Securities Commission Malaysia ("SC") to deal in unit trusts funds.

The cooling-off period shall be within six (6) Business Days from the date the Manager receives the duly completed form. The investors shall be refunded within seven (7) Business Days (from the date of receipt of the cooling-off notice by the investors). Any application for cooling-off must be made before the cut-off time of 4:00 p.m. on any Business Day.

For investors who invest via the EPF Member Investment Scheme ("EPF MIS"), the cooling-off period shall be subject to EPF's terms and conditions, and any refund pursuant to the exercise of the cooling-off right will be credited back into your EPF accounts.

Note: Please read and understand the Fund's prospectus and its supplemental prospectus (if any) before investing in the Fund.

FUND PERFORMANCE

Average Total Returns

The basis of calculating the average total returns is by calculating the growth of the NAV of the Fund at the start point against the NAV of the Fund at the end point of the calculation period of 1 year, 3 years, 5 years and 10 years. We take into account and factor in all the distributions and unit splits into the NAV of the Fund for the purposes of the calculations.

*The financial year end of the Fund has changed from 31 December to 31 January with effect from 2 October 2023.

1-Year Fund Performance Review

The Fund significantly outperformed its benchmark during the financial period under review, mainly attributable to the capital appreciation of its corporate bond holdings.

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE.

APPENDIX : GLOSSARY						
Business Day	Means a day on which the stock exchange managed or operated by Bursa Malaysia Securities Berhad is open for trading.					
Total Expense Ratio (TER)	Total annual expenses incurred by the Fund Average NAV of the Fund calculated on daily basis This ratio will inform you of the total expenses incurred by the Fund during the year as compared to its average NAV. Total expenses include management fee, trustee fee and expenses incurred for fund administrative services. A low TER indicates the effectiveness of the Manager in managing the expenses of the Fund.					
medium to long term	Refers to a period of three (3) to five (5) years.					
Net Asset Value (NAV)	Means the total value of the Fund's assets minus its liabilities at the valuation point. In computing the annual management fee and annual trustee fee, the NAV of the Fund should include the management fee and the trustee fee for the relevant day.					
NAV per Unit	Means the NAV of the Fund divided by its total number of units in circulation.					
Portfolio Turnover Ratio (PTR)	Refers to the measure of trading activity or how frequently assets within a fund are bought and sold by the Manager. A fund with a 0.5 times portfolio turnover ratio, for example, replaces half of its holdings during the period under review. A fund with a high portfolio turnover rate will typically incur more transaction costs than one with a low portfolio turnover rate. The computation of PTR is as follows :					
	(Total acquisitions of the Fund + Total disposals of the Fund) / 2					
	PTR = Average NAV of the Fund calculated on a daily basis					
Unit(s)	Means a unit of a Fund and includes a fraction of a unit.					
Unit Holder(s)/ Investor(s)	Means the person for the time being registered under the provisions of the deed as the holder of units and includes the Manager and joint-holder.
