#### PRODUCT SUITABILITY

##### WHO IS THE PRODUCT SUITABLE FOR?

This Fund is suitable for investors who:

- (i) wish to participate in the potential benefits derived from investment in companies involved in the mining and exploration of precious metals, energy or base metals;
- (ii) wish to diversify their investment portfolio from traditional asset classes; and
- (iii) are willing to accept a higher risk in their investments to obtain potentially higher returns in the long term\*.

\*Note: "long term" in this context refers to a period of between 5 – 7 years.

#### KEY PRODUCT FEATURES

##### WHAT ARE YOU INVESTING IN?

This Fund aims to achieve returns on investment mainly in securities of corporations (whether or not listed on any stock exchange, and in any part of the world) whose business (in any part of the world) is or is substantially in the mining or extraction of gold, silver or precious metals (e.g. platinum, palladium, rhodium etc.), bulk commodities (e.g. coal, iron ore, steel etc.), base metals of all kinds (e.g. copper, aluminium, nickel, zinc, lead, tin etc.), and other commodities (e.g. industrial minerals, titanium dioxide, borates etc.) and it includes the mining or extraction of oil, gas, coal and alternative energy or other commodities or other minerals.

##### Investment Strategy

The Fund will invest principally in one of the funds managed by UOB Asset Management Ltd, Singapore ("UOBAM") that is the United Gold and General Fund ("UGGF"). UGGF, launched in June 1995 is a collective investment scheme domiciled in Singapore. Both UOBAM and UGGF are regulated by the Monetary Authority of Singapore under the Securities and Futures Act (Chapter 289), Singapore. UGGF invests in companies involved in the mining and exploration of precious metals, energy and base metals.

Its asset allocation is as follows:

At least 95% of Net Asset Value

- Investments in the units of United Gold and General Fund.

2% - 5% of Net Asset Value

- Investments in liquid assets including money market instruments and deposits with financial institutions.

Although the Fund is passively managed, the investments in the Fund will be rebalanced from time to time to meet sales and redemptions transactions and to enable the proper and efficient management of the Fund.

The Manager does not adopt a temporary defensive position for the Fund in response to adverse market, economic, political, or any other conditions as such defensive strategies are expected to be implemented at the target fund level, i.e. UGGF when deemed necessary by the UGGF's manager. The Manager does not adopt any temporary defensive positions as this will allow the Fund to best track the performance of UGGF. It also follows that if the UGGF fails to adopt a successful defensive position in response to adverse market and economic conditions, there is a risk that the Fund will mirror the UGGF's negative performance, if any. Also, investors should note that at all times the Fund is always subject to currency risk.

This Fund is a feeder fund that invests at least 95% of its Net Asset Value in UGGF. The risk management strategies and techniques employed will be at the UGGF level together with its investment strategy that involves diversification among its asset allocation of securities of companies involved in the mining and exploration of precious metals, energy and the base metal as well as diversification across global markets.

Notwithstanding the above, the Manager may, in consultation with the Trustee and with the Unit Holders' approval, replace UGGF with another fund of a similar objective if, in the Manager's opinion, UGGF no longer meets this Fund's investment objective, or when acting in the interest of the Unit Holders.

##### Performance Benchmark

70% FTSE Gold Mines Index (RM)

30% Euromoney Global Mining Index (formerly known as HSBC Global Mining Index) (RM)

Note: The risk profile of the Fund is different from the risk profile of the benchmark.

### Mode of Income Distribution

Distribution, if any, after deduction of taxation and expenses, (i.e. net distribution) will be reinvested to purchase additional units of the Fund based on the Net Asset Value per unit of the Fund as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

### Distribution Policy

Consistent with the Fund's objective to achieve long term\* capital appreciation, distributions will therefore be of secondary importance. Distributions, if any, will be reinvested after deduction of taxation and expenses.

Note: \* "long term" in this context refers to a period of between 5 – 7 years.

### KEY RISKS

#### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

As this Fund invests at least 95% of its Net Asset Value in UGGF, it is subject to the management risk of the management company and investment manager of UGGF. Poor management of UGGF will jeopardise the investment of this Fund in UGGF and in turn, the Unit Holders' investment.

In addition, as UGGF is domiciled in Singapore and is denominated in Singapore dollars, this Fund may be subject to currency and country risk. Changes in rates of exchange between currencies may cause the value of this Fund's investments in UGGF to diminish or increase which in turn will affect the value of Unit Holders' investments.

The Fund's investments in UGGF may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in Singapore.

Furthermore, investments in UGGF are subject to the following risks:

- *Market risk in the global markets*
- *Foreign exchange / currency risk*
- *Political risk*
- *Derivatives risk*
- *Liquidity risk in UGGF's investments*
- *Small capitalisation companies risk*
- *Single sector risk*
- *Commodities risk*
- *Broker risk*
- *Counterparty risk*
- *Equity risk as UGGF is an equity fund*

These specific risks of UGGF are elaborated in the Master Prospectus.

## VALUATIONS AND EXITING FROM INVESTMENT

### HOW OFTEN ARE VALUATIONS AVAILABLE?

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia.

Accordingly, the valuation of the Fund for a Business Day will be conducted before 5.00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day would be available.

As such, the daily price of the Fund for a particular Business Day will not be published in the media on the next day in which the Manager is open for business but will instead be published the next following day (i.e. the price will be two (2) days old). This will be specifically indicated in the newspapers.

Investors may however obtain the most current computed price by contacting the Manager directly or visiting our website, [www.rhbgroup.com](http://www.rhbgroup.com).

### HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered office or any of its branch offices, or to any of its authorised sales agents or participating IUTAs before their respective cut-off times. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase.

For partial redemption, the balance of units of the Fund held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance.
