KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with capital growth and recurring income[^] in the medium to long term* through investments in securities of and securities relating to Malaysian companies which offer attractive yields and sustainable dividend payments.

Note: ^The income is in the form of units. Please refer to the Fund's distribution mode.

** "medium to long term" in this context refers to a period between 3 - 7 years.*

INVESTMENT STRATEGY

The Fund aims to achieve its objective through investments in companies that focus on shareholder value in the form of sustainable dividend returns or have the potential to offer dividend yields combined with the prospect for growth.

Hence, the Manager's strategy is to identify companies that offer or have the potential to offer dividend yields and whose cash flow generated by business and management activities are expected to support such dividend payment. The Manager may also invest in growth or recovery stocks which have the potential to adopt a strong dividend payout policy.

The Fund will also invest in fixed income securities where the potential returns from these securities are favourable as compared to equities. The Fund's investment in fixed income securities will be that of debt securities issued by corporations, financial institutions and government (comprising amongst others of convertible debt securities, redeemable debt securities, bonds / securities that are issued and/or guaranteed by the government or quasi-government agencies, corporate bonds carrying at least BBB ratings by any domestic rating agencies or its equivalent rating by a reputable rating establishment) as well as fixed income collective investment scheme, money market instruments, cash and deposits with financial institutions.

The Manager employs fundamental and bottom-up valuation analysis as an integral part of their investment process. This includes evaluation of company management, products & services, competitive positioning, operating outlook, earnings prospects, risk factors and corporate governance standards, looking at discounted cashflow models, comparative multiples (eg. price earnings ratio, price to book value) and profitability measures (eg. returns on equity).

This Fund's portfolio will be structured as follows:

70% to 98% of net asset value ("NAV") - Investment in equity and equity-related securities of Malaysian companies which offer attractive yields[#] and sustainable dividend payments.

2% - 30% of NAV - Investment in liquid assets, fixed income securities, money market instruments and deposits with financial institutions.

Subject to the range stipulated above, the asset allocation will be reviewed from time to time depending on the judgement of the Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will depend on market opportunities.

The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. equity, fixed income securities and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in market value and other available investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission Malaysia. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits with financial institutions, which are defensive in

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective to provide medium to long term* capital growth and recurring income[^], the Fund will distribute a substantial portion of its returns to the unit holders of the Fund ("Unit Holder(s)"). Distributions, if any, will be declared annually and will be reinvested after deduction of taxation and expenses.

Note: [^]The income is in the form of units. Please refer to the Fund's distribution mode.

** "medium to long term" in this context refers to a period between 3 - 7 years.*

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter. No sales charge will be imposed for any reinvestment of distribution into the Fund.

KEY RISKS

As this Fund invests in a portfolio mix mainly of equity and equity-related securities which offer attractive yields and sustainable dividend payments and fixed income securities, money market instruments and deposits with financial institutions or liquid assets, certain specific risks peculiar to this Fund are:

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in or global markets and subsequently the value of the Fund's investments.

PARTICULAR SECURITIES RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities comprising the Fund's portfolio will cause the unit price of the Fund to rise or fall accordingly.

INTEREST RATE RISK - Prices of fixed income securities generally move in opposite direction with interest rates. When interest rates rise, prices of fixed income securities will generally fall. This rise in interest rates will cause the investor to face the risk of capital loss. However, when interest rates fall, prices of fixed income securities will generally increase, thus investors will see capital gains.

CREDIT / DEFAULT RISK - This refers to the creditworthiness of the fixed income securities issuer and its expected ability to repay debt. Default happens when the issuer is not able to make timely coupon payments and/or repay or pay the principal in a timely manner thus lowering the value of the Fund's investments and subsequently the value of Unit Holders' investments.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
