KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with a high level of liquidity[^] whilst providing reasonable returns by investing in low risk investments.

Note: ^ Redemption monies of the Fund will generally be paid the day following the next Business Day after receipt by the Manager of request to repurchase.

INVESTMENT STRATEGY

This Fund seeks to achieve its objective through investments in a portfolio of money market instruments and other short term debt securities and placements of deposits with financial institutions. Investment in debt securities issued by financial institutions or private entities must at the point of purchase, carry a credit rating of at least A/P3 by any domestic rating agencies or its equivalent rating by a reputable rating establishment. Should the ratings thereafter be downgraded below the said minimum credit rating, such papers shall be disposed of within a reasonable time frame taking into consideration prevailing market conditions and factors.

Thus, this Fund's portfolio will be structured as follows:

90% - 100% of the Net Asset Value ("NAV") - Investments in debt securities, money market instruments and placements of deposits ("Permitted Investments") with financial institutions which have a remaining maturity period of not more than 397 days.

0% - 10% of the NAV - Investments in debt securities, money market instruments and placements of deposits with financial institutions which have a remaining maturity period of more than 397 days but less than 732 days.

Although the Fund is actively managed, its fund management strategy will depend on the interest rate environment and the anticipated redemption requests by unit holders of the Fund ("Unit Holder(s)").

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward.

The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors, countries and asset classes and/or type of investments (i.e. bonds and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission Malaysia. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective to provide reasonable returns, the Fund will distribute a substantial portion of its returns to Unit Holders. Distributions, if any, after deduction of taxation, if any, and expenses, are generally declared annually and will be reinvested.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units of the Fund shall be within two (2) weeks thereafter. No sales charge/transaction fee will be imposed for any reinvestment of distribution into the Fund.

KEY RISKS

INTEREST RATE RISK - Interest rate risk is crucial in this Fund since debt securities, money market instruments and deposits portfolio management depends on forecasting interest rate movements. Interest rate changes could affect the Fund's portfolio adversely if the strategy taken by the fund manager differs from the actual outlook of the interest rates market. With respect to debt securities, prices of debt securities generally move in opposite direction with interest rates. When interest rates rise, prices of debt securities will generally fall. This rise in interest rate would cause the investor to face the risk of capital loss. But when interest rates fall, prices of debt securities would generally increase, therefore, investors would see capital gains. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured debt securities, money market instruments and deposits depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.

CREDIT/DEFAULT RISK - This refers to the creditworthiness of the debt security issuer and its expected ability to make coupon payments and/or repay or pay the principal in a timely manner. Default happens when the issuer is not able to make timely coupon or profit payments and/or repay or pay the principal in a timely manner thus lowering the value of the Fund's investments and subsequently the value of Unit Holders' investments.

INFLATION / PURCHASING POWER RISK - Inflation can be defined as increases of the price level of goods and services and is commonly reported using the consumer price index as a measure. Inflation is one of the major risks to investors and results in uncertainty over the future value of the investments. Inflation reduces purchasing power of money. In an inflationary environment, fixed income securities are exposed to higher inflation risks than equities due to its fixed returns nature as compared to equities whose returns are variable.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
