PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) want a professionally managed portfolio of shares and fixed income securities;
- (ii) have a medium to long term investment horizon of 3 to 5 years or more;
- (iii) want to achieve regular income and capital gain at an acceptable level of risk; and
- (iv) want to invest in shares but do not have the time to manage their own portfolio.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

To provide investors with regular income and capital gain at an acceptable level of risk by investing primarily in Malaysian public listed companies with steady and good growth potential.

INVESTMENT STRATEGY

The Fund seeks to achieve its investment objective by structuring a portfolio as follows:

- Minimum of 50% and up to 95% of net asset value ("NAV") will be invested in equities.
- Minimum of 5% of NAV will be invested in fixed income securities and/or liquid assets.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund seeks regular income and capital gain. To pursue this goal, the Fund invests primarily in Malaysian public listed companies with steady income and good growth potential. In analysing companies, the Manager looks for businesses that demonstrate leadership in their respective sector with strong growth potential coupled with consistent dividend policy.

The Manager uses fundamental valuation parameters, focusing on several key numbers with respect to the company's historical price levels and relative value to its peer universe. These numbers include price and earnings multiple of the company, earnings growth rates, relative price earnings to growth, dividend yield, cashflow, balance sheet strength, quality of management, return on assets and return on investments, among others. Quarterly earnings expectations and results are carefully followed. Subject to the range stipulated above, the Fund's asset allocation and stock selection could differ if key macro and micro factors materially changes.

In addition to those described above, the Fund may invest in fixed income securities to preserve the value[#] of the Fund.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits, which are defensive in nature.

Note: [#]Although the Fund aims to preserve its value, the Fund is not a capital guaranteed fund or a capital protected fund.

FTSE Bursa Malaysia Kuala Lumpur Composite Index ("FBM KLCI").

Distribution (if any) which is more than the amount of RM300.00, will be automatically paid out to the Unit Holders via cheque, unless the Unit Holder specifically requests for the distribution to be reinvested into the Fund by selecting the appropriate option in the application form. Unit Holders who opt for their distribution to be reinvested into the Fund will have their distribution reinvested into the Fund based on the NAV per unit seven (7) Business Days after the ex-dividend date. No sales charge or costs shall be incurred or payable by the Unit Holders for the reinvestment.

A Unit Holder must notify the Manager in writing seven (7) Business Days prior to each date fixed for the distribution of any change in his distribution instructions.

KEY RISKS

STOCK MARKET RISK - Securities may decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets. The value of a security may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investors' sentiment generally. They may also decline due to factors that affect a particular industry or industries, such as labour shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater price volatility than fixed income securities. The market price of securities owned by the Fund might go down or up, sometimes rapidly or unpredictably.

LIQUIDITY RISK - Liquidity risk exists when particular investments are difficult to sell, possibly preventing the Fund from selling such illiquid securities at a favourable price. The Fund's principal investment strategies that involve securities or securities with substantial market and/or credit risk tend to have greater exposure to liquidity risk. As part of its risk management, the Manager will attempt to manage the liquidity of the Fund through asset allocation and diversification strategies within the portfolio. The Manager will also conduct constant fundamental research and analysis to forecast future liquidity of its investments.

INDIVIDUAL STOCK RISK - The performance of each individual stock that the Fund invests in is dependent upon the management quality of the particular company and its growth potential. Hence, this would have an impact on the Fund's prices and its dividend income. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio. In addition, the Manager will also perform continuous fundamental research and analysis to aid its active asset allocation management especially in its stock selection process.

ISSUER RISK - The value of each individual fixed income securities that the Fund invests in may decline for a number of reasons which is directly related to the issuer, such as, the management performance, financial leverage and reduced demand for the issuer's goods or services. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
