PRODUCT SUITABILITY

This Fund is suitable for investors who:

- require investments that comply with Shariah requirements; and
- are willing to accept moderate risk in their investments in order to achieve long term* growth.

Note: * "long term" in this context refers to a period of between 5 – 7 years.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with long term* capital growth by investing in Shariah-compliant global equities.

Note: * "long term" in this context refers to a period of between 5 – 7 years.

INVESTMENT STRATEGY

The Fund seeks to achieve its investment objective through a diversified portfolio of Shariah-compliant equities issued by companies listed on the stock exchanges of Developed Markets^.

The Fund's investments in such companies are not industry or sector specific. The External Investment Manager believes investments in "quality" companies will result in the Fund outperforming its benchmark over the long term. The "quality" screen filters companies that meet the three (3) following criteria:

- market capitalisation of USD 500 million or above;
- attractive dividends (companies with dividend yield that are higher than the respective regional indices with a track record of growing dividends progressively); and
- quality income growth (consistent long term capital and dividend growth).

For investments in Shariah-compliant equities listed in Japan stock exchanges, the External Investment Manager will focus its investments in companies with:

- sustainable high return on equity above the market average in the past with the expectation to maintain such high return of equity in the future; and
- return on equity below the market average but are expected to sustain high return on equity compared to market average in the future.

The risk management strategies and techniques employed by the External Investment Manager include observing internal limits of the Fund's investments in terms of its exposure to sectors, countries and stocks, apart from complying with the investment restrictions of the Fund. Additionally, the External Investment Manager reviews the Fund's asset allocation and currency exposure with its quantitative and fixed income departments to review such exposure to the Fund. The External Investment Manager further monitors the Fund's performance and risk against other global equity portfolios to ensure commonality in the active and total risk undertaken amongst portfolios with similar investment universe and objectives.

This Fund's portfolio will be structured as follows:

70% to 98% of Net Asset Value ("NAV") - Investments in Shariah-compliant equities of companies listed on the stock exchanges of Developed Markets.
2% - 30% of NAV - Investments in Islamic liquid assets including Islamic money market instruments and placements of cash in any Islamic deposits or Islamic investment accounts with any financial institution, which are not embedded or linked to financial derivative instruments ("Placements of Cash").

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The External Investment Manager may take temporary defensive positions in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the External Investment Manager may reallocate up to 100% of the Fund's equity investments into other asset classes which are defensive in nature and comply with Shariah requirements, such as Islamic money market instruments and Placements of Cash.

Dow Jones Islamic Market Developed Markets Index.

DISTRIBUTION

DISTRIBUTION POLICY - Distribution is of secondary importance and if any, will generally be declared annually and will be reinvested.

DISTRIBUTION MODE - Distributions, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units of the Fund are quoted ex-entitlement. Allotment of such units of the Fund shall be within two (2) weeks thereafter. No sales charge will be imposed for any reinvestment of distribution of the Fund.

KEY RISKS

EQUITY RISK - The fluctuation in the performance of Shariah-compliant equities held by the Fund will affect the NAV. The performance of the Shariah-compliant equities is dependent on company specific factors like the company's business situation. If the company-specific factors deteriorate, the price of the specific equity may drop significantly and permanently. Such event could possibly occur even in a positive equity market trend. The risk will be managed via portfolio diversification of the Fund's investments in terms of its exposure to equity from various industries, sectors and countries. In addition, where necessary, exposure to a particular Shariah-compliant equity will also be reduced in the event of an anticipated weakness in the fundamentals of that particular Shariah-compliant equity or other factors like the company's business situation.

CURRENCY RISK - This risk is associated with investments that are quoted in foreign currency denomination. When a security is denominated in a foreign currency which fluctuates unfavourably against the RM, the Fund may face currency loss. This may lead to a lower NAV expressed in RM. In addition, an investor investing into a class denominated in currencies other than in RM may also be subject to further currency risk as fluctuation to the exchange rate of the respective currency of that class against RM may impact the value of the NAV per unit expressed in the currency of the relevant class. The Fund may participate in Shariah-compliant currency hedging instruments to mitigate the currency risk, if necessary.

COUNTRY RISK - The Fund will be investing in foreign markets. The foreign investments portion of the Fund may be affected by risks specific to the country that the Fund invests in. Such risks include changes in the country's economic fundamentals, social and political stability, currency movements and foreign investments policies. These factors may impact the prices of the securities that the Fund invests in and ultimately lower the NAV.

RECLASSIFICATION OF SHARIAH STATUS RISK - This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of such equities in accordance with the Fund's Shariah investment guidelines.

EQUITY RELATED SECURITIES RISK - The Fund may also invest in equity related securities such as warrants provided that the underlying securities comply with Shariah requirements. As warrants are linked to the particular equity securities from which they are derived, the warrants inherit the risks linked to that underlying equity security such as market risk, currency risk, country risk, industry risk and liquidity risk. Thus, the value of the investments in warrants is also subject to the day to day movement in the prices of their underlying equity securities. Warrants also have a limited life and if they are not exercised at the maturity, they will expire. Warrants become worthless if they are not exercised before maturity, causing the value of the Fund's investments to fall. Like any other investments, the fall in the value of the Fund's investments will ultimately lower the NAV.

Note: If your investments are made through an institutional unit trust scheme adviser ("IUTA") which adopts the nominee system of ownership, you would not be deemed to be a unit holder of the Fund ("Unit Holder") under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit Holder (e.g. the right to call for Unit Holders' meetings and the right to vote at a Unit Holders' meeting). Accordingly, the Manager will only recognise the IUTA as a Unit Holder and the IUTA shall be entitled to all the rights conferred to it under the deed of the Fund.
